The Routledge Handbook of Translation and Culture collects into a single volume thirty-two state-of-the-art chapters written by international specialists, overviewing the ways in which translation studies has both informed, and been informed by, interdisciplinary approaches to culture. The book's five sections provide a wealth of resources, covering both core issues and topics in the first part. The second part considers the relationship between translation and cultural narratives, drawing

on both historical and religious case studies. The third part covers translation and social contexts, including the issues of cultural resistance, indigenous cultures and cultural representation. The fourth part addresses translation and cultural creativity, citing both popular fiction and graphic novels as examples. The final part covers translation and culture in professional settings, including cultures of science, legal settings and intercultural businesses. This handbook offers a wealth of information for advanced undergraduates, postgraduates and researchers working in

translation and interpreting studies.

This volume deals with different aspects of the creation and use of multilingual corpora. The term 'multilingual corpus' is understood in a comprehensive sense, meaning any systematic collection of empirical language data enabling linguists to carry out analyses of multilingual individuals, multilingual societies or multilingual communication. The individual contributions are thus concerned with a variety of spoken and written corpora ranging from learner and attrition corpora, language contact corpora and interpreting

corpora to comparable and parallel corpora. The overarching aim of the volume is first to take stock of the variety of existing multilingual corpora, documenting possible corpus designs and uses, second to discuss methodological and technological challenges in the creation and analysis of multilingual corpora, and third to provide examples of linguistic analyses that were carried out on the basis of multilingual corpora.

This volume contains the proceedings of the
