~~This study guide is designed to help test takers get a better understanding of the material on the national exam. Each topic is broken down into separate chapters, ending with an easy to follow answer key. All questions are multiple choice with four answers to choose from. Book Chapters Include: The Cardiovascular System, The Digestive System, The Nervous System, The Endocrine System, The Urinary System, The Integumentary System, The Skeletal System, The Muscular System, The Respiratory System, Medication, Vitamins & Herbs, Eastern Methods & Theory, Massage Fundamentals, and Assorted Test QuestionsGreat prep tool for the NCSTMB and the MBLEx exams.~~

Table of Contents: 1 Introduction to the human body 2 Basic chemistry 3 Cells 4 Cell metabolism 5 Microbiology and Infection (suggest renaming to reflect contents) 6 Tissues and membranes 7 Integumentary system and temperature regulation 8 Skeletal system 9 Muscular system 10 Nervous System: Nervous Tissue and the Brain (only slight change) 11 Nervous system: spinal cord and peripheral nerves 12 Autonomic nervous system 13 Sensory system 14 Endocrine system 15 Blood 16 Anatomy and Physiology of the heart (merge of Chapters 16 and 17) 17 Anatomy and Physiology of the Blood Vessels (merge of Chapters 18 and 19) 18 Respiratory system (previously Chapter 22) 19 Lymphatic system 20 Immune system 21 Digestive system 22 Urinary system 23 Water, electrolyte and acid-base balance 24 Reproductive systems 25 Human development and heredity Answers to Review Your Knowledge and Go Figure Questions Glossary

Congratulations! You have taken a major positive step toward excelling in your college-level (or advanced high school level) Human Anatomy course. Welcome to the First Edition of The Essential Human Anatomy Compendium, which is a study guide in the format of lecture outline notes compiled from different instructors. How is our study guide different from others already in publication? The format of this book is the outline form, which lends itself to easy perusing. KEY WORDS or PHRASES are EMPHASIZED VISUALLY and as CONCISELY as possible, in order to break up the monotony, which is often seen in long-winded textbooks. Though the goal is brevity, these outline notes still provide COPIOUS INFORMATION, which is not represented in other study guides in existence. The approach of this study guide is to allow the student to comprehend the gist of basic anatomical concepts. This study guide is organized into five key sections: (1) Introductory and Microscopic Anatomy, including cytology (cell study) and histology (tissue study); (2) Skeletal Anatomy, including axial and appendicular skeletal anatomy and accessory structures; (3) Muscular Anatomy, focusing on the origin, insertion, and action of key muscles required for most students to learn; (4) Neuroanatomy, including the Central Nervous System (brain and spinal cord), Peripheral Nervous System (including critical Autonomic Nervous System features), and general and special Sensory Anatomy; and (5) Systemic Anatomy, targeting the eleven human body organ systems and their components. Additionally, The Essential Human Anatomy Compendium includes sample multiple-choice questions, which will prepare you for the key levels of anatomy examquestions. These questions have been developed by various instructors from several disciplines. For Instructors: Answer sheets to the questions are also provided after each set of questions so that students may complete them and submit them for instructor review (and perhaps for credit). How to use The Essential Human Anatomy Compendium: Due to the nature of this book, it should be utilized as a key study tool prior to course exams, prior to, after and/or during class lectures, or it may be used as a remedial preparation tool for Board exams in various disciplines. Whether your academic training specialty is in Nursing, Dentistry, Dental Hygiene, Occupational or Physical Therapy, Athletic Training, or Pharmacy et.al, you will undoubtedly find The Essential Human Anatomy Compendium a useful tool, which will help you to excel in the subject of anatomy. Good luck on your journey of discovery! H.P. Doyle

Anatomy and Physiology Coloring Workbook is an excellent tool for anyone who is learning basic human anatomy and physiology. The author's straightforward approach promotes and reinforces learning on many levels through a wide variety of visual and written exercises. Along with its review of the human body from microscopic to macroscopic levels the workbook also includes practical, clinically oriented activities. The Human Body: An Orientation, Basic Chemistry, Cells and Tissues, Skin and Body Membranes, The Skeletal System, The Muscular System, The Nervous System, Special Senses, The Endocrine System, Blood, The Cardiovascular System, The Lymphatic System and Body Defenses, The Respiratory System, The Digestive System and Body Metabolism, The Urinary System, The Reproductive System. For all readers interested in learning the basics of anatomy and physiology.

This study guide is designed to help test takers get a better understanding of the material on the national exam. Each topic is broken down into separate chapters, ending with an easy to follow answer key. All questions are multiple choice with four answers to choose from. Book Chapters Include: The Cardiovascular System, The Digestive System, The Nervous System, The Endocrine System, The Urinary System, The Integumentary System, The Skeletal System, The Muscular System, The Respiratory System, Medication, Vitamins & Herbs, Eastern Methods & Theory, Massage Fundamentals, and Assorted Test Questions Great prep tool for the NCBTMB and the MBLEx exams.
