Choudhary Book  
presents the fundamentals explicitly and clearly. The scope of the text is such that it can be used for a two-semester course in control systems at the level of undergraduate students in any of the various branches of engineering (electrical, aeronautical, mechanical, and chemical). Emphasis is on the development of basic theory. The text is easy to follow and contains many examples to reinforce the understanding of the theory. Several software programs have been developed in MATLAB platform for better understanding of design of control systems. Many varied problems are included at the end of each chapter. The basic principles and fundamental concepts of feedback control systems, using the conventional frequency domain and time-domain approaches, are presented in a clearly accessible form in the first portion (chapters 1 through 10).

It is a N.I.C.E initiative by Dr. Biswaroop Roy Chowdhury, with a network of more than 200 influenza care experts spread across the nation with the intention to take care of and cure ILI/Covid-19 patients. Anyone with flu symptoms may contact the N.I.C.E. helpline No - +91 8587059169 and the link [www.biswaroop.com/nice](http://www.biswaroop.com/nice) and the expert would connect within 2 hours to provide round the clock support till the patient recovers. In the last 40 days, N.I.C.E. has cured more than 5000 patients with its revolutionary 3 step flu diet with zero medication and is happy to announce that in doing so, it has achieved zero mortality. This service is absolutely free of cost.

This book offers an excellent and practically oriented introduction to the basic concepts of modern circuit theory. It builds a thorough and rigorous
