Stargazing is among the most peaceful and inspiring outdoor activities. Night Sky, the award-winning book by Jonathan Poppele, makes it more fun than ever! Take a simple approach to finding 62 constellations by focusing on one constellation at a time, instead of attempting to study dizzying charts. Start with the easy-to-find constellations during each season and work toward the more difficult ones. Better yet, you'll learn how to locate any constellation in relation to the Big Dipper, the North Star and the top of the sky. With two ways to locate each constellation, you'll know where in the sky to look and what to look for! Along the way, you'll be introduced to mythology, facts and tidbits, as well as details about the planets, solar system and more! As an added bonus, the book comes with a red-light flashlight for night reading.

A handy field guide for the optimum stargazing experience, whether you're travelling, camping, or in your own backyard! The night sky is full of amazing things to see, from shooting stars and constellations, to planets and satellites, but it can be hard to tell what you're seeing, or where to look for the best view. 100 Things to See in the Southern Night Sky lets you know what you can expect to see on any given night, whether you're using a small telescope, or just your naked eye. 100 Things to See in the Southern Night Sky—especially for those south of the equator—includes background information on the makeup, appearance, and history of each celestial object, along with easy-to-follow instructions on the best way to catch a glimpse of these cosmic glories. With this helpful guide you'll have the world on a string—or more precisely, the sky in your hands.
