~~Nursing: The Philosophy and Science of Caring~~

A philosophy of nursing is a statement, sometimes written, that declares a nurse's beliefs, values, and ethics regarding their care and treatment of patients while they are in the nursing profession. Although the philosophy may seem solely academic and too cerebral to be of any use, it is vital to approaching your profession in an appropriate manner. When you develop a personal philosophy of nursing, it benefits your career and the lives of the people you provide care to and their families ...

~~What is a Philosophy of Nursing?~~

January 18, 2019. by Joseph M. Nursing practice comprises of the three major components, namely science, ethics and aesthetic (Bruce, Rietze, & Lim, 2014). Nursing practitioners deliver the components using two major philosophical approaches, notably, philosophy of care and philosophy of therapy. Philosophy is a critical part of nursing profession and discipline because it is closely related to the three components of care.

" Nursing: The Philosophy and Science of Caring is a positive, upbeat, depiction of what nursing should be. The poetry and artwork not only add to the text, but incorporate art with science, much as Watson called for in nursing education.

Jean Watson's first edition of Nursing, now considered a classic, introduced the science of human caring and quickly became one of the most widely used and respected sources of conceptual models for nursing. This completely new edition offers a contemporary update and the most current perspectives on the evolution of the original philosophy and science of caring from the field's founding scholar. A core

concept for nurses and the professional and non-professional people they interact with, "care" is one of the field's least understood terms, enshrouded in conflicting expectations and meanings. Although its usages vary among cultures, caring is universal and timeless at the human level, transcending societies, religions, belief systems, and geographic boundaries, moving from Self to Other to community and beyond, affecting all of life. This new edition reflects on the universal effects of caring and connects caring with love as the primordial moral basis both for the philosophy and science of caring practices and for healing itself. It introduces Caritas Processes, offers centering and mediation exercises on an included audio CD, and provides other energetic and reflective models to assist students and practitioners in

cultivating a new level of Caritas Nursing in their work and world.

Named a 2013 Doody's Core Title! "A challenge ahead for nursing is to take the path of most resistance rather than the easier road of least resistance. The debate needs to continue...[by focusing on] whether nursing is teaching an appropriate level of inquiry including philosophy and methodologies specific to those real-world, rapidly changing conditions that characterize today's practice environment." From the Foreword by Sally J. Reel, PhD, RN, FNP, BC, FAAN, FAANP University of Arizona College of Nursing "I have taught a philosophy of science course intermittently for about 20 years. Philosophy of Science for Nursing Practice is

not only the most succinct, insightful, well-organized presentation of information I've yet seen, but drives thinking to where it ought to be." Laura Cox Dzurec, PhD, PMHCNS-BC Dean and Professor Kent State University College of Nursing "This appears to be the first book that focuses on the philosophy of science and its application to practice doctorates. The authors assume readers may not have a formal background in the philosophy of science, and write in a conversational tone with a minimum of difficult terminology. They discuss the current state of DNP education in a way that can foster discourse and debate." Score: 97, 5 Stars.

--Doody's Medical Reviews Tailored for both DNP and PhD doctoral nursing programs, this text is the first to focus on philosophy of science applications to the discipline of nursing.

The authors, a philosopher and a nurse-scholar who co-teach the course upon which this volume is based, address a growing need for increased philosophy of science content in evolving DNP programs, as well as practice-oriented research considerations for this discipline. The volume presents a creative use of the social, political, and historical content in which nursing has evolved. As a whole, this extremely important text reassures the student of the fluid and palpable connections between philosophy of science and nursing science and practice. Key Features: Explores the concept of nursing as a practice profession and assesses how much philosophy of science is needed for doctoral nursing students. Examines the practical application of the philosophy of science to both DNP and PhD students. Addresses the basic

principles and concepts of the philosophy of science and their practical application for contemporary practice inquiry.

Provides an overview of the century-long path to the development of nursing science that is an essential "bridge" to the philosophy of science content and serves as a "next step" towards building a nursing epistemology Reinforces important connections between the philosophy of science to nursing science and nursing practice.

Nurses who conduct research have a longstanding interest in questions of nursing knowledge. Nursing Knowledge is a clear and well-informed exposition of the philosophical background to nursing theory and research. Nursing Knowledge answers such fundamental questions as: How is

Read Online Nursing The Philosophy And Science Of Caring

nursing theory related to nursing practice? What are the core elements of nursing knowledge? What makes nursing research distinctive as nursing research? It examines the history of the philosophical debates within nursing, critiques the arguments, explains the implications and sets out to rethink the philosophical foundation of nursing science.

Nursing Knowledge begins with philosophical problems that arise within nursing science. It then considers various solutions with the help of philosophical ideas arguing argues that nurses ought to adopt certain philosophical positions because they are the best solutions to the problems that nurses encounter. The book argues claims that the nursing standpoint has the potential to disclose a more complete understanding of human health than the common disease-

and-dysfunction views. Because of the relationship to practice, nursing science may freely draw theory from other disciplines and nursing practice unifies nursing research. By redefining theory and philosophy, With a new philosophical perspective on nursing science, the so-called relevance gap between nursing theory and practice can be closed. The final chapter of the book 'redraws the map', to create a new picture of nursing science based on the following principles: Problems of practice should guide nursing research Practice and theory are dynamically related Theory research must provide the knowledge base necessary for nurse interventions, training, patient education, etc. Nursing research should develop midrange theories and its results are nursing theory is strengthened when it uses theories
