Mateer and Coppock's approach teaches economic decision-making with applications that students will remember.

Tending to her sick grandmother while trapped under the weighty debts of her deceased father, Kyra Symington works endlessly at a real-estate company during the day and a restaurant at night. One day James Redman, a talented young colleague at her company, chooses her as his project assistant. It's a once-in-a-lifetime opportunity, but without much flexibility in her work hours, Kyra is

and gesturing body in the arts. Broadly inspired by phenomenology, and taking into account insights from cognitive science, the contribution of the motor body in watching a film, attending a dance or theatre performance, looking at paintings or drawings, and listening to music is explored from a diversity of perspectives. This volume is intended for both the specialist and non-specialist in the fields of art, philosophy and cognitive science, and testifies to the burgeoning interest for the moving and gesturing body, not only in the creation but also in the perception of works of art. Imagination is tied to our capacity to silently resonate with the way a work of art has been or is created.

Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice - one that asserts the importance of the experiential side of illness, and thus restores

the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader, *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.

This is first comprehensive introduction to the linguistics of Auslan, the sign language of Australia. Assuming no prior background in language study, it explores each key aspect of the structure of Auslan, providing an accessible overview of its grammar (how sentences are structured), phonology (the building blocks of signs), morphology (the structure of signs), lexicon (vocabulary), semantics (how meaning is created), and discourse (how Auslan is

used in context). The authors also discuss a range of myths and misunderstandings about sign languages, provide an insight into the history and development of Auslan, and show how Auslan is related to other sign languages, such as those used in Britain, the USA and New Zealand. Complete with clear illustrations of the signs in use and useful further reading lists, this is an ideal resource for anyone interested in Auslan, as well as those seeking a clear, general introduction to sign language linguistics.
