necessary for the understanding of today's systems as well as for those systems yet to come. The space formerly occupied by outdated photographs of manufacturers' product and of older system installations has now been filled with new measurements and discussions of the measurement process. The "Mathematics for Audio chapter has been expanded to include the mathematics of phasors. The "Interfacing Electrical and Acoustic Systems chapter has a completely new section covering the analysis of alternating current circuits. Additionally, system gain structure is now treated by both the available input power

method and the voltage only method, complete with illustrations of each. All chapters dealing with loudspeaker directivity and coverage, the acoustic environment, room acoustics, speech intelligibility, and acoustic gain appear in up to date versions. In addition there is new material on signal delay and synchronization and equalization. There are completely new chapters on microphones, loudspeakers and loudspeaker arrays including line arrays with steering and beam-width control, and signal processing, both analog and digital. The book runs the gamut of sound system design from

Shame." Some are longer, some shorter, like the real-world conversations they so closely resemble, and each comes from the fertile mind of John Piper and is written in his own inimitable style. Together, the readings will lead to a deeper understanding of God and a cleaner, clearer relationship with Him. Most of all, Piper's approach shows how meditating on God's powerful Word can affect every aspect of our lives. Whether you're steeped in the Word of God or newly acquainted with it, these thirty-one meditations will penetrate to the deepest reaches of your soul. With a contagious passion, John Piper
