The beautiful locales, exotic plant and sea life, and relaxing environs of dive locations are even more peaceful when you are armed with the expertise and skill to stay safe in any situation. With self-rescues, buddy rescues, open-water resuscitation, and towing techniques, Scuba Diving Safety will become your most valuable diving companion. Covering a full range of underwater environments, as well as dangerous marine life, entanglements, and equipment failures, this vital resource is an essential reference for every underwater enthusiast. Do not rely on someone else—or chance—to keep you safe. Let Scuba Diving Safety help you prepare for the unexpected and provide the confidence to enjoy your underwater adventures to the fullest.

The real-world guide for divers who want to enjoy their sport to the fullest More than half of the 1.5 million people who achieve scuba certification each year are stymied in their pursuit of the sport because they lack time and money to enjoy the exotic diving experiences they've read about, and don't want to be confined to group dives. The Certified Diver's Handbook is the only guide to help them create their own diving adventures on any budget, on any schedule, in waters local or distant, and without the restrictions of group demands. Thirty-year diving veteran and photojournalist Clay Coleman provides the insider's tips and how-to advice divers need to equip, plan, and execute their own diving expeditions. Divers will learn how to: Buy or rent the best SCUBA equipment at the best prices Plan dives to maximize enjoyment and safety Find great diving sites close to home Master underwater rescue procedures and shore- and night-diving techniques Explore wrecks, reefs, and underwater caves

Filled with more than 350 images from National Geographic, 100 Dives of a Lifetime provides the ultimate bucket list for ardent scuba divers and aspirational travelers alike. From diving with manta rays at night in Kona, Hawaii, and swimming with hammerheads of Cocos Island in Costa Rica to exploring caves in Belize's Lighthouse Atoll and diving beneath the ice floes of Antarctica, this exquisite inspirational book is filled with beautiful imagery, marine life guides, trusted travel tips, and expert diving advice from world-famous National Geographic divers and explorers like Brian Skerry, Jessica Cramp, and David Doubilet. Organized by diving experience and certification level, each location offers a once-in-a-lifetime opportunity to explore the magic of our world's oceans—from your armchair or with your scuba gear in tow.

Scuba Exceptional is the perfect sequel to Simon Priddy's Scuba Confidential - An Insider's Guide to Becoming a Better Diver. It reflects the same philosophy of safe diving through the acquisition of knowledge and skills. The themes are new, there are some wonderful and extremely useful new cautionary tales and the focus this time is more on issues that face experienced divers. For example, there is more technical diving content but, as usual, Simon covers complex issues in his usual clear and easy-to-read style. In many cases, the concerns of technical divers reflect those of scuba divers at every level. After all, as he says, technical diving is on the same spectrum as conventional sport diving: it is just a different frequency. Scuba Exceptional also deals in detail with the psychological approach to scuba diving, broaching topics from new angles and borrowing techniques and procedures from other fields of human activity. While most of Scuba Exceptional focuses on the diver, it also takes a look at the wider picture and highlights a number of areas where scuba diving professionals and the "industry" as a whole are letting divers down. As always, Simon is realistic in his assessments. He may shine a little light on the dark side of the scuba diving world, but he does this in order to illuminate bad practice and encourage change, while offering solutions. He also provides insights on a wide range of topics. For instance, do you want to know... what makes someone a good diver? how to swim against a current without getting exhausted? how you can be out of air while you still have plenty to breathe? what the concept of failure points is? how to be a defensive diver? how preconditioning applies to scuba diving? how long you should really wait between diving and flying? when to call DAN (and when not to call)? how corals could possibly be animals when they look like rocks? how to avoid being left behind in the ocean? what's happening in the world of rebreather diving? or what the perimeter of ignorance is? Scuba Exceptional has the answers to these questions and a lot more
