Recipes are presented in a range of themed menus for a variety of social occasions, with wine recommendations to partner many of them. You will find classic dishes, healthy options, and indulgent delights. Also covers new ideas for entertaining with cheese and wine, as well as tips for creating cheeseboards to reflect the seasons.

If you've ever tasted a food you love with a wine that matches it perfectly, you'll know that the combination of the two can be even better than the food or wine on its own. But how to find those divine pairings? With 'Perfect Pairings' you can try the expert recommendations of wine expert Fiona Beckett or experiment to discover your own personal favourites. Also included is a superb range of menus for entertaining, with recommendations for the ideal wine to partner each of over 100 mouth-watering recipes. Classic dishes sit alongside the intriguingly original, and light options are featured as well as indulgent delights. Finally, a section devoted to cheese teaches you how to put together the perfect cheeseboard. All this plus at-a-glance food and wine matching guides, tips on decanting and serving wine at home and a glossary of wine terms.

This is the first book to explain and demonstrate the tremendous ability of Pulse-Coupled Neural Networks (PCNNs) when applied to the field of image processing. PCNNs and their derivatives are biologically inspired models that are powerful tools for extracting texture, segments, and edges from images. As these attributes form the foundations of most image processing tasks, the use of PCNNs facilitates traditional tasks such as recognition, foveation, and image fusion. PCNN technology has also paved the way for new image processing techniques such as object isolation, spiral image fusion, image signatures, and content-based image searches. This volume contains examples of several image processing applications, as well as a review of hardware implementations.
