Samantha King explains how, beyond being an all-too-frequent and still-too-lethal disease for many women, breast cancer is a corporate dream come true. Herizons Fascinating. King's deft and thoughtful interpretation of the pink ribbon phenomenon is an important wake-up call. Going against the grain, she takes a clear-eyed look at a trend that often seems to outshine the disease that put it on the map. Women's Review of Books King's criticisms of breast-cancer philanthropy provide a new means of looking at one of our culture's most celebrated causes. For anyone who has ever squirreled away yogurt lids for the cause, Pink Ribbons, Inc. is food for thought. Bitch A fascinating read for anyone whose life has been touched by breast cancer. Curve Breast cancer advocacy is being transformed from meaningful civic participation into purchasing products. To understand the personal, social, and political costs, read this book. Barbara Brenner, Executive Director of Breast Cancer Action In Pink Ribbons, Inc., Samantha King traces how breast cancer has been transformed from a stigmatized disease and individual tragedy to a market-driven industry of survivorship. Here, for the first time, King questions the effectiveness and legitimacy of privately funded efforts to stop the epidemic among American women. Highly revelatory-at times shocking-Pink Ribbons, Inc. challenges the commercialization of the breast cancer movement. Samantha King is associate professor of physical and health education and women's studies at Queen's University, in Kingston, Ontario

"Updated with images and a new introduction on recent controversies"--Cover.

Exposes the downside of America's penchant for positive thinking, which the author believes leads to self-blame and a preoccupation with stamping out "negative" thoughts on a personal level, and, on a national level, has brought on economic disaster.

The pink ribbons are everywhere, but how much do you really know about breast cancer? Did you know there are many kinds of breast cancer? Do you know your risks? Do you know how to reduce those risks? If you ever receive this diagnosis, what would you want to know? Beyond the Pink Ribbon is the story of one woman's journey with Stage III Invasive Lobular Carcinoma. In this book, Michele shares all the information she wished she had known before her diagnosis, including translating medical jargon, understanding her treatment options, evaluating the risks that led to the disease, and regaining her lost health. Told through the lens of her own experiences, the book is easily conversational and enlightening.

In a study funded by the Susan G. Komen for the Cure® Foundation, Dr. Mary Flynn

researched the effects of an olive-oil-and-plant-based diet on overweight women who had previously undergone treatment for invasive breast cancer. Now, she reveals her findings in *The Pink Ribbon Diet*. Not only is this program more effective than the National Cancer Institute's recommended low-fat diet, but it is also a diet that women find more satisfying and can thereby sustain for life. The Pink Ribbon Diet features 150 recipes that naturally emphasize Mediterranean foods with nutrients thought to lower breast-cancer risk and foods that improve biomarkers, indicators of risk. This diet has been effective in helping women who have had breast cancer and those at risk of getting it to avoid unhealthy weight gain and safeguard their health.

“What kind of cancer is it?” was the first question Barbara Brenner asked her doctor after hearing that the lump in her breast was malignant. His answer: “You don't need to know that.” Wrong response. Brenner, who was already an activist, made knowing her business and spreading knowledge her mission. The power behind Breast Cancer Action and its transformative Think Before You Pink® campaign, Barbara Brenner brought an abundance of wit, courage, and clarity to the cause and forever changed the conversation. What had been construed as an individual crisis could now be seen for what it was: a pressing concern of public health and social justice, with environmental issues at the center of prevention efforts. Collected in *So Much to Be Done*, and framed by personal accounts of Barbara and her influential work, Brenner’s columns and blog posts form a chronicle of breast cancer research and health care activism that is as inspiring as it is informative. As she takes on the corporate forces at work in breast cancer research and treatment and in the “pinkwashing” of fund-raising for the cause, Brenner, a self-described hell-raiser, contends with cancer herself, twice, and her words offer understanding and encouragement to all those whose lives are touched by the disease. When Brenner was diagnosed with ALS in 2011, she broadened her critique of health care while also writing about her own experience. Infused with her characteristic moxie, humor, anger, and compassion, these reflections from her last two years provide an in-depth, precisely observed portrayal of what it is to live with a terminal disease and to die on one’s own terms.

Sixteen young survivors tell their remarkable stories of breast cancer diagnosis and survival--all before the age of 40. Featured stories by authors Amber Treadwell, Asheley Goergen, Caitlin Adkins, Connie Sun, Elizabeth Jones, Emily Dickey, Erin Baldwin, Jennifer Hart, Jennifer Wilson, Jessica Freiburger, Laura Currens, Nicole Gibson, Porscha Nikkole, Shon Dansby, Soleil Luke, and Stephanie Reed. All proceeds from this book will be donated to the Pink Ribbon Girls in Tipp City, Ohio.

The founder and CEO of Susan G. Komen for the Cure shares the inspirational story of her late sister's battle with breast cancer and the author's contributions to establishing one of the world's most influential health advocacy organizations. Reprint. A best-selling book.

*Disrupting Breast Cancer Narratives: Stories of Rage and Repair* explores politically insistent illness narratives.

*Beyond the Pink Ribbon* provides an in-depth view of the author's seven year spiritual journey through breast cancer. *Beyond the Pink Ribbon* pierces the veil of the breast cancer experience and tells how the author survived Stage IV breast cancer without the traditional treatments of surgery, chemotherapy, or radiation. Very much like Job, the author faced and overcame tremendous adversity. *Beyond the Pink Ribbon* reveals the author's unwavering faith in the promises of God.
