The 4th edition of Plumbing continues to provide the definitive single volume text on plumbing, heating and gas installation work, ideal for students working towards their Diploma in plumbing or NVQ/SVQ at levels 2 and 3. Highly illustrated and easy to read and understand, it tackles plumbing topic by topic, in double page spreads with text, full colour illustrations, and clear photographs, enabling the reader to grasp the essentials quickly and easily. This approach ensures it also provides a concise reference for the trained plumber. Special features include: concise text many clear, full colour illustrations around 140 photographs topics focussed on the needs of NVQ/SVQ levels 2 and 3 additional topics beyond levels 2 and 3 a self-assessment section a problem-solving section This new edition has been thoroughly updated to take account of changes to the Building Regulations, including changes to the following approved documents: Part F: Ventilation, Part G: Sanitation, hot water safety and water efficiency; Part H: Drainage and waste disposal, Part L: Conservation of fuel and power and Part P: Electrical safety. A significant new section on energy conservation & sustainability has been added, and additional related material introduced where relevant. The extensive coverage with new, full colour illustrations to enhance legibility and understanding, and the emphasis on safety in the work place ensure this remains the definitive single volume for both student and trained plumbers.

Packed with charts and tables that simply let you look up the answers you need, this handy new tool for plumbers and pipe fitters gives you a ready source of commonly used calculations, formulas and, best of all, solutions.

An anecdotal history of plumbing from the Harappan of 3000 B.C. to the modern world is a tribute to such engineering achievements as the lead pipes of the Roman empire, the sewers of London, and Japanese toilets. By the author of Stolen Water. Reprint. 20,000 first printing.

An expert plumber explains how to install and repair plumbing systems in new and old homes.

Hodding Carter writes, "The unsung hero of human history was, of course, the Brain of Drains, the Hub of Tubs, the Power of Showers, the Brewer of Sewers... the humble plumber.... The Irish may have saved civilization, once, but plumbers have done so countless times." When we consider the amenities that really make a difference in our well-being, surely good plumbing must rank near the top. But rarely have we taken the time to appreciate the engineering marvels that bring clean water into our homes with the turn of a tap and wash our waste products away with the flip of a lever. Until now. Witty, anecdotal, and thoroughly entertaining, Flushed not only chronicles the long and notable history of plumbing, but follows Hodding Carter's travels and travails as he casts his own Roman lead water pipes inspired by the writings of Pliny the Elder, descends into the sewers of London, installs a state-of-the-art Japanese toilet in his bathroom, and fearlessly tries to understand everything about this most underappreciated pillar of civilization. A winning combination of history, science, and firsthand experience, Flushed will entertain and educate all those who have never contemplated the hidden intricacies of this miracle of everyday technology.
