1- I was trying to log in to HDX-7000 portal . using this ID: admin and password: 456. also using ID: Polycom and password: 456 . but it didn't work also I reseted the unit and tried above login details again , still it doesn't work . Any hint? 2- I am trying to use the remote control that come with the unit . but the unit is not responding.

What is Default ID/Password for HDX 7000 — Polycom

I have just bought a second-hand Polycom HDX 7000. I'm trying to set it up without any real knowledge of how it's supposed to work, beyond the basic setup document which just lists the various parts. You can see from the attached file what I have plugged in at the back - microphone, camera, display, LAN and power. The problem is that despite having the display cable plugged directly into my TV ...

Solved: HDX 7000 — no display on LCD TV — Poly Community

Prior to connecting the PC output to the HDX 7000 the PCs desktop was successfully displayed on a digital monitor, using the same cable that was then plugged in to the HDX 7000, all of which seems to confirm that a signal is being sent from the PC. Also, when "display near video" is checked the camera output is successfully displayed. However when the content button is pushed without the PC ...

Polycom HDX 6000 Series

Polycom HDX systems do not use their USB ports as a video source. If the camera you are using has a supported output, see the User's Guide for HDX Room systems, you can input it on the DVI input, which supports both digital and analog inputs. The other video input, the HDCI, is primarily designed for the Polycom EagleEye cameras. The EagleEye ...

This book examines the relationships between online visual interfaces and language use in educational contexts and the features that underpin them to explore the complex nature of online communication and its implications for educational practice. Adopting a case study approach featuring a global range of examples, the volume uniquely focuses on multimodal intercultural interactions, with a particular interest in videoconferencing, to look at how they project and reflect particular cultural values and tendencies concerning language use and how they elucidate the complex cultural identifications and affiliations inherent in intercultural encounters. The book employs a diverse range of theoretical and research frameworks to highlight the dynamic connections between digital technology, social life, and language use, and the ways in which they can inform language education, making this an ideal resource for students and scholars in applied linguistics, communication studies, media studies, information studies, and education.

Health security is dependent on many factors such as: individual government policies and regulations; budgets; management systems; and the collection, analysis, use, and protection of data. Telemedicine has the potential to change how healthcare is delivered around the world, and has developed to the point where it is possible for its use to become commonplace. The questions are, however, whether and how the use of telemedicine will improve health security in Southeast Europe. This book presents papers from the NATO Advanced Research Workshop (ARW) on Benchmarking Telemedicine: Improving Health Security in the Balkans, held in Skopje, Macedonia, in November 2016. The aim of the workshop was to bring together people from a wide range of sectors within the telemedicine community with representatives of NATO Member and Partner countries to share information and develop solutions to health security issues. Participants addressed issues such as cyber security for the implementation of telemedicine; healthcare capabilities of deployed and local medical equipment; learning methods; information sharing among local professionals; prevention and control of infectious diseases; best practices of telemedicine among NATO Member and Partner countries; integration of telemedicine across regions and borders; and telemedicine implementation. The book will be of interest to all those wishing to gain a better insight into the implications of telemedicine for health security.

The volume constitutes a state-of-the-art account of issues related to teaching, learning and testing speaking in a second language. It brings together contributions by Polish and international scholars which seek to create links between theory, research and classroom practice, report the findings of studies investigating the impact of linguistic, cognitive and affective factors on the development and use of speaking skills, and provide concrete pedagogic proposals for instruction and assessment in this area. As such, the book will be of interest not only to second language acquisition theorists and researchers, but also to foreign language teachers willing to enhance the quality of speaking instruction in their classrooms.

Health care is primarily about people-to-people interactions. It is about understanding, diagnosis, physical contact, communication, and, ultimately, providing care. By bringing people together, telecommunication technologies have the potential to improve both the quality of and access to health care in the remotest areas of the developing world. Telemedicine offers solutions for emergency medical assistance, long-distance consultation, administration and logistics, supervision and quality assurance, and education and training for healthcare professionals and providers. This book aims to redress the relative lack of published information on successful telehealth solutions in the developing world. It presents real-life stories from Asia, Africa, and Latin America. It is rich in practical experience and will be of interest to health professionals, development workers, and e-health and telehealth proponents interested in learning about, or contributing to the implementation of, appropriate solutions for 80% of the world's population.

An inspirational story of a man who overcame obstacles and challenges to achieve his dreams. In an accident in 1980, Limbie, a healthy young man, was reduced to a quadriplegic. Read through his fears, sorrow, hope and courage in this heart-open honest book.
