The module in private international law focuses on the theory and practice of international commercial court litigation. This module on dispute resolution focuses mainly on Alternative Dispute Resolution (ADR) methods. These methods include negotiation, conciliation, mediation and arbitration.

This course addresses dispute resolution in international cases from the classical perspective of the private-public divide. The main focus relates to overlapping remedies available under private international and public international law. Nowadays, a multitude of courts and arbitral tribunals at different levels (domestic, international and transnational) is accessible to litigants in cross-border settings.

The contributions in this book cover a wide range of topics within modern dispute resolution, which can be summarised as follows: harmonisation, enforcement and alternative dispute resolution. In particular, it looks into the impact of harmonised EU law on national rules of civil procedure and addresses the lack of harmonisation in the US regarding the recognition and enforcement of foreign judgments. Furthermore, the law on enforcement is examined, not only by focusing on US law, but also on how to attach assets in order to enforce a judgment. Finally, it addresses certain types of alternative dispute resolution. In addition, the book looks into the systems and cultures of dispute resolution in several regions of the world, such as the EU, the US and China, that have a high impact on globalisation. Hence, the book is diverse in the sense of dealing with multiple issues in the field of modern dispute resolution./div The book offers explorations of the impact of international rules and EU law on domestic civil procedure, through case studies from, among others, the US, China, Belgium and the Netherlands. The relevance of EU law for the national debate and its impact on the regulation of civil procedure is also considered. Furthermore, several contributions discuss the necessity and possibility of harmonisation in the emergency arbitrator mechanisms in the EU. The harmonisation of private international law rules within the EU, particularly those of a procedural nature, is juxtaposed to the lack thereof in the US. Also, the book offers an overview of the current dispute settlement mechanisms in China. The publication is primarily meant for legal academics in private international law and civil procedure. It will also prove useful to practitioners regularly engaged in cross-border dispute resolution and will be of added value to advanced students, as well as to those with an interest in international litigation and more generally in the area of dispute resolution. Vesna Lazić is Senior Researcher at the T.M.C. Asser Institute, Associate Professor of Private Law at Utrecht University and Professor of European Civil Procedure at the University of Rijeka. Steven Stuij is an expert in Private International Law and a PhD Candidate/Guest Researcher at the Erasmus School of Law, Rotterdam. Ton Jongbloed is Guest Editor on this volume./div

No field of legal scholarship or practice operates in the world of private international law as continuously and pervasively as does international arbitration, commercial and investment alike. Arbitration's dependence on private international law manifests itself throughout the life-cycle of arbitration, from the crafting of an enforceable arbitration agreement, through the entire arbitral process, to the time an award comes before a national court for annulment or for recognition and enforcement. Thus international arbitration provides both arbitral tribunals and courts with constant challenges. Courts may come to the task already equipped with longstanding private international law assumptions, but international arbitrators must largely find their own way through the private international law thicket. Arbitrators and courts take guidance in their private international law inquiries from multiple sources: party agreement, institutional rules, treaties, the national law of competing jurisdictions and an abundance of "soft law," some of which may even be regarded as expressing an international standard. In a world of this sort, private international law resourcefulness is fundamental.

This volume considers the application of dispute resolution theory and practice to international conflicts and explores the uses of formal processes such as diplomacy or treaty formation, as well as more informal processes such as multiple-track private negotiations or peace workshops. The volume also presents materials on more innovative forms of complex transnational or sub-national conflict resolution, such as transitional and restorative justice institutions and processes, both formal (truth and reconciliation commissions) and indigenous and informal (Rwandan gacaca). The articles are selected from both public and private international law settings and query whether universal principles of multi-national dispute resolution are possible or whether each conflict is likely to be sui generis or requiring deep contextual analysis and integrity. They also explore the dialogic, as well as dialectical, relationships in the development of conflict resolution theory and practice in multi-cultural and multi-disciplinary settings and show that the application of dispute resolution theories from multiple sources and cultures (both Western and Eastern, as well as Northern and Southern) to multiple sites of conflicts (including courts, tribunals and other forms of dispute resolution at different levels and from multiple jurisdictions) raises important dilemmas of universalism and particularism in international conflict resolution.

Assembled from Dispute Resolution Journal - the flagship publication of the American Arbitration Association - the chapters in the Handbook have all, where necessary, been revised and updated prior to publication. The book is succinct, comprehensive and a practical introduction to the use of arbitration and ADR, written by leading practitioners and scholars. The Handbook contains valuable guidance on international commercial arbitration, including the management of arbitration disputes, how to select an international arbitral institution, an explanation of the effect of international public policy, the duties of arbitrators, the presentation and evaluation of evidence in international arbitration, and how to arbitrate against a state sovereign. The enforcement of international arbitral awards is explored, including interim relief and problems with enforcement, the New York Convention, parallel proceedings, and pivotal decisions such as Chromalloy and TermoRio. International mediation is also examined, including guidelines for selecting the best mediator for an international dispute, the power of mediation to resolve international commercial disputes, and the differences in U.S. and European approaches. Lastly, the section on investment and trade arbitration and mediation explores bilateral investment treaties, examines WTO arbitration procedures, offers advice on saving time and money in cross-border commercial disputes, and provides guidance for U.S. investors to follow in dealing with sovereign states. The chapters in the Handbook were selected from an extensive body of writings and, in the main, represent world-class assessments of arbitration and ADR practice. All the major facets of the field are addressed and provide the reader with comprehensive and accurate information, lucid evaluations, and an indication of future developments. They not only acquaint, but also ground the reader in the field.

"In a world where the borders of the global community are fluid, and where disputants manifest increasingly diverse attributes and needs, mediation ? for decades hovering at the edge of dispute resolution practice ? is now emerging as the preferred approach, both in its own right and as an adjunct to arbitration. Mediation processes are sufficiently flexible to accommodate a range of stakeholders (not all of whom might have legal standing) in ways the formality of arbitration and litigation would not normally allow. Among mediation?s many advantages are time and cost efficiencies, sensitivity to cultural differences, and assured privacy and confidentiality. This book meets the practice needs of lawyers confronted with cross-border disputes now arising far beyond the traditional areas of international commerce, such as consumer disputes, inter-family conflicts, and disagreements over Internet-based transactions. The author takes full account of mediation?s risks and limitations, primarily its lack of finality and uncertainty in relation to enforceability issues which will persist until the advent of appropriate international regulation."--Publisher's website.

Despite the unprecedented growth of arbitration and other means of ADR in treaties and transnational contracts in recent years, there remains no clearly defined mechanism for control of the system. One of the oldest yet largely marginalized concepts in law is the public policy exception. This doctrine grants discretion to courts to set aside private legal arrangements, including arbitration, which might be considered harmful to the "public". The exceptional and vague nature of the doctrine, along with the strong push of actors in dispute resolution, has transformed it, in certain jurisdictions, to a toothless doctrine. At the international level, the notion of transnational public policy has been devised in order to capture norms that are "truly" transnational and amenable for application in cross-border litigations. Yet, despite the importance of this discussion—a safety valve and a control mechanism for today's international and domestic international dispute resolution—no major study has ventured to review and analyze it. This book provides a historical, theoretical and practical background on public policy in dispute resolution with a focus on cross-border and transnational disputes. Farshad Ghodoosi argues that courts should adopt a more systemic approach to public policy while rejecting notions such as transnational public policy, which limits the application of those norms with mandatory nature. Contrary to the current trend, the book invites the reader to re-conceptualize the role of public policy, and transnational dispute resolution, in order to

have more sustainable, fair and efficient mechanisms for resolving disputes outside of national courts. The book sheds light on one of the most important yet often-neglected control mechanisms of today's international dispute resolution and will be of particular interest to students and academics in the fields of International Investment Law, International Trade Law, Business and Economics.

This book provides an insight into commercial relations between large economies and Small States, the benefits of regional integration, the role of Small States as financial centres as well as B2B and State to State dispute resolution involving Small States. Several contributions allow the reader to familiarise themselves with the general subject matter; others scrutinise the particular issues Small States face when confronted with an international dispute and discuss new and innovative solutions. These solutions range from inventive ideas to help economic growth to appropriate mechanisms of dispute resolution including inter-State dispute resolution and specific areas of arbitration such as tax arbitration. Researchers, policy advisors and practitioners will find a wealth of insights, information and practical ideas in this book.
