"Rational Suicide, Irrational Laws argues that laws aimed at preventing suicide and laws aimed at facilitating it co-exist because they are based on two radically disparate conceptions of the would-be suicide. This is the first book that unifies policies and laws toward people who want to end their lives"--

The Convention on the Rights of Persons with Disabilities (CRPD) has generated new ideas and standards in healthcare and disability law and policy. In the mental health context, the CRPD directs governments to ensure people with mental impairments are treated equally before the law, including ensuring people have access to the resources necessary to enjoy their rights. But what this means in practice remains unclear. In addition, current domestic laws that authorise involuntary psychiatric interventions stand at cross-purposes with the CRPD, which requires respect for the 'will, preference and rights' of persons with disabilities 'on an equal basis with others'. This book explores the implications of the CRPD for law, policy and practice that responds to the complex issues raised by mental health impairment and disability. It argues that the support framework of the CRPD holds potential to address persistent shortcomings in mental health law and policy.

Modern cases highlight the legal principles involving parties and situations that are entrepreneurial in nature in this one-of-a kind text. Students are presented with solid doctrine in the various disciplines covered in Entrepreneurship Law and come to understand their interrelatedness. A chronological approach, from the conception of the idea through all stages of the business, includes potential exit strategies such as the sale of the venture or an initial public offering. Hypotheticals, in the form of a running case study based on the authors' vast experience as practicing attorneys, focus on the very real issues entrepreneurs face. The authors teach at Northwestern Law, well-known for its entrepreneurship course, which is one of the longest-running in the United States. Entrepreneurship Law: Cases and Materials is the only law school casebook of its kind. New to the Second Edition: New cases and readings reflecting changing doctrine in employment law, intellectual property, and securities law (including crowdfunding) Greater attention to social entrepreneurs, including the addition of public benefit corporations, L3Cs, and nonprofits to the chapter on creating an entity Refreshed and updated readings and materials reflecting current trends and practices in financing of entrepreneurial ventures Updates reflecting feedback from current adopters and students in the authors' course at Northwestern Professors and student will benefit from: Modern cases that highlight the legal principles involving parties and situations that are entrepreneurial in nature Presents solid doctrine in the various disciplines covered in Entrepreneurship Law while also emphasizing their interrelatedness Provides a chronological approach to the subject, from the conception of the idea through all stages of the business, including potential exit strategies such as the sale of the venture or an initial public offering Contains hypotheticals and involved, practice-oriented skills-based problems that focus on actual issues entrepreneurs face that are informed by the authors' real experiences as practicing attorneys Classroom tested by faculty at multiple law schools. Authors teach at Northwestern Law, well-known for its entrepreneurship course, one of the longest-running in the United States The only law school casebook of its kind Teaching materials Include: Website for adopting faculty with resources including sample syllabi, practice problems, and other curricular materials

Though widely regarded as a founder of the modern field of psychology and law, German-American psychologist Hugo M\u00fcnsterberg's now century-old ideas and research approaches continue to thrive. In fact, the discipline still grapples with many of the issues raised by M\u00fcnsterberg in his seminal 1908 book, On the Witness Stand. Hugo M\u00fcnsterberg's Psychology and Law makes M\u00fcnsterberg's enduring insights available to a new generation of scholars, presenting the "state of the science" on the concepts that M\u00fcnsterberg was one of the first to investigate. These include eyewitness memory, deception detection, false confessions, and the causes of criminal behavior. Opening with a brief biography of M\u00fcnsterberg and a historical overview of the field, the book's organization follows that of On the Witness Stand, with each chapter providing a summary of M\u00fcnsterberg's work followed by a contemporary perspective on the topic. Chapters challenge readers to consider what we have learned since M\u00fcnsterberg's time and whether subsequent research has shown him to be right or wrong. The final chapter asks what M\u00fcnsterberg may have missed, and what we may be missing today. This volume will be of interest to a broad range of scholars, practitioners, and professionals in the legal and mental health fields.

Adolescence, Privacy, and the Law provides a foundation for understanding privacy rights and how they relate to adolescents. Roger Levesque argues that because privacy is actually an inherently social phenomenon, the ways in which adolescents' privacy needs and rights are shaped are essential to society's broader privacy interests. A close look at empirical understandings of privacy, how it shapes development, and how privacy itself can be shaped provides important lessons for addressing the critical juncture facing privacy rights and privacy itself. Adolescence, Privacy, and the Law provides an overview of the three major strands of privacy rights: decisional, spatial, and informational, and extends current understandings of these strands and how the legal system addresses adolescents and their legal status. Levesque presents comprehensive and specific analyses of the place of privacy in adolescent development and its outcomes, the influences that shape adolescents' expectations and experiences of privacy, and ways to effectively shape adolescents' use of privacy. He explains why privacy law must move in new directions to address privacy needs and pinpoints the legal foundation for moving in new directions. The book charts broad proposals to guide the development of sociological responses to changing social environments related to the privacy of adolescents and challenges jurisprudential analyses claiming that developmental sciences do not offer important and useful tools to guide responses to adolescents' privacy. Lastly, Levesque responds to likely criticisms that may hamper the development of sociological stances more consistent with adolescents' needs for privacy as well as with societal concerns about privacy.

An empirical look at the U.S legal system's effectiveness in addressing school segregation reveals that segregation persists and even surpasses levels experienced before the Civil Rights Movement. Yet, lawmaking continues as though segregation is a thing of the past. The negative effects of racial and ethnic disparities in schooling are well documented, but legal analysts increasingly interpret the law as a system that operates independently of research findings clearly pointing to disparities. For their part, researchers continue to document experiences of segregation without considering the legal system's basic concerns. The Science and Law of School Segregation and Diversity examines the sources of the disconnect between scientific findings on school segregation and how the U.S. legal system addresses it; evaluates these sources' empirical and legal foundations; explains why they persist; and reveals what can be done about them. Roger Levesque, a scholar with expertise in children's rights, family law, and adolescence, provides an overview of how the legal system approaches inequality based on racial/ethnic status. He presents an analysis of the empirical findings relating to the implementation of laws that would address racial disparities in schooling and educational outcomes. Finally, Levesque challenges jurisprudential claims that the developmental sciences do not offer important and useful tools to guide responses to differential treatment and circumstances based on race. This book will appeal to individuals interested in legal responses to schooling's place in society, discrimination, diversity, inequality, and more broadly, civil rights. The text will also appeal to developmentalists interested in prejudice, discrimination, and social development, and researchers, scholars, and students in law and psychology, law and education, law and human development, and law and society.

When a loved one with mental illness comes into contact with the law, trying to advocate for them can be an overwhelming and frustrating endeavor. Mental illness adds a layer of complexity to legal processes, and the justice system can be downright bewildering, even for the most well-intentioned. How can families find out if their loved one is being mistreated or ignored, and how can they make sense of their rights under various laws and regulations? Family Guide to Mental Illness and the Law offers the nuts-and-bolts legal information and problem-solving steps families need. This accessible resource explains how common legal issues uniquely impact people with various forms of mental illness and what family members can do to help. Readers will learn how to - help protect a loved one's job, housing, or medical care - participate in hearings about guardianship, involuntary commitment, bankruptcy, and more - assist in making financial arrangements - navigate federal laws surrounding the Family and Medical Leave Act, HIPAA, disability claims, and workers' compensation - steer criminal proceedings away from jail and toward treatment Beyond the legal system, this book also guides readers in interacting with officials and authorities, lobbying for better laws, and working with local governments towards improving policies that affect those with mental illness. Complete with real-world examples, Family Guide to Mental Illness and the Law provides practical advice and eases the feelings of isolation that often accompany loving someone with mental illness.

Eyewitness research has focused mainly on stranger identification, but identification is also critical for the "familiar stranger", and understanding how variability in an eyewitness's familiarity with the perpetrator may influence recall and recognition accuracy will facilitate swifter and more just resolutions to crime. Familiarity and Conviction in the Criminal Justice System examines the notion of familiarity between an eyewitness/victim and a perpetrator, ranging from complete unfamiliarity (as with a total stranger) to a very familiar other. Authors Joanna Pozzulo, Emily Pica, and Chelsea Sheahan define what is meant by "familiarity" in an eyewitness context and how it has been operationalized and manipulated, exploring factors that may interact with familiarity and examining jurors' perceptions of it. The first half of the book draws on various sub-areas of psychology to understand familiarity against the backdrop of eyewitness identification: social psychology theories of how familiarity is established; cognitive psychology and its theories of recognition; face

processing literature; and eyewitness literature. The second half of the book surveys system and estimator variables that influence identification, such as lineup procedures, interviewing techniques, the role of age, race, and more; as well as how familiarity is weighed in juror decision-making. A final chapter issues a call for continuing research examining the notion of familiarity and its impact on the criminal justice system.

The jury is often hailed as one of the most important symbols of American democracy. Yet much has changed since the Sixth Amendment in 1791 first guaranteed all citizens the right to a jury trial in criminal prosecutions. Experts now have a much more nuanced understanding of the psychological implications of being a juror, and advances in technology and neuroscience make the work of rendering a decision in a criminal trial more complicated than ever before. *Criminal Juries in the 21st Century* explores the increasingly wide gulf between criminal trial law, procedures, and policy, and what scientific findings have revealed about the human experience of serving as a juror. Readers will contemplate myriad legal issues that arise when jurors decide criminal cases as well as cutting-edge psychological research that can be used to not only understand the performance and experience of the contemporary criminal jury, but also to improve it. Chapter authors grapple with a number of key issues at the intersection of psychology and law, guiding readers to consider everything from the factors that influence the initial selection of the jury to how jurors cope with and reflect on their service after the trial ends. Together the chapters provide a unique view of criminal juries with the goal of increasing awareness of a broad range of current issues in great need of theoretical, empirical, and legal attention. *Criminal Juries in the 21st Century* will identify how social science research can inform law and policy relevant to improving justice within the jury system, and is an essential resource for those who directly study jury decision making as well as social scientists generally, attorneys, judges, students, and even future jurors.

Over 95% of criminal convictions are by guilty plea. Trials are the rarity, and while much has been written on jury decision making and various parts of the trial process, the field has been largely silent on the practice that is most likely to affect an individual charged with a crime: plea bargaining. *A System of Pleas: Social Science's Contributions to the Real Legal System* brings together into one resource the burgeoning body of research on plea bargaining. Drawing attention to the fact that convictions today are nearly synonymous with guilty pleas, this contributed volume begins with an overview and history of plea bargaining, with chapters focusing on defendants, defense attorneys and prosecutors and plea bargains; influences on plea decision-making, including race, juvenile justice system involvement, and innocence; and the results of a "system of pleas", such as sentencing disparities and mass incarceration, collateral consequences, and disenfranchisement. A concluding chapter by the volume's editors examines ways to move forward within an entrenched system. An excellent reference tool for furthering both research and practice, *A System of Pleas* is a must-have for academics and legal professionals interested in the fields of criminal justice, psychology and law, and related disciplines.
