A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will

revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us."  
—Katie Patrick, author of *How to Save the World*

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. *Hustle and Float* explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

"It seemed as if Theodore Roosevelt's biographers had closed the book on his life story. But Ryan Swanson has uncovered an untold chapter"

(Johnny Smith, coauthor of *Blood Brothers: The Fatal Friendship between Muhammad Ali and Malcolm X*). Crippling asthma, a frail build, and grossly myopic eyesight: these were the ailments that plagued Teddy Roosevelt as a child. In adulthood, he was diagnosed with a potentially fatal heart condition and was told never to exert himself again. Roosevelt's body was his weakness, the one hill he could never fully conquer—and as a result he developed what would become a lifelong obsession with athletics that he carried with him into his presidency. As President of the United States, Roosevelt boxed, practiced Ju-Jitsu, played tennis nearly every day, and frequently invited athletes and teams to the White House. It was during his administration that America saw baseball's first ever World Series; interscholastic sports began; and schools began to place an emphasis on physical education. In addition, the NCAA formed, and the United States hosted the Olympic Games for the first time. From a prize-winning historian, this book shows how Roosevelt fought desperately (and sometimes successfully) to shape American athletics in accordance with his imperialistic view of the world. It reveals that, in one way or another, we can trace our fanaticism for fitness and sports directly back to the twenty-sixth president and his relentless pursuit of "The Strenuous Life." "Essential reading for anyone who cares about the history of sports in America." —Michael Kazin, author of *War against War: The American Fight for Peace, 1914-1918*

First in the YA bestselling fantasy trilogy of the battle between Light and Dark. "If you loved the Twilight series, you will love this book."—Giuliana Rancic, E! News anchor Caroline Ellis' sixteenth birthday sets into motion a series of events that have been fated for centuries. A descendant of Virginia Dare, the first child born in the lost colony of Roanoke, and unaware of her birthright as the heir to the throne of the Light Fae, it isn't until Caroline begins a tumultuous relationship with Devilyn Reilly that the truth of her heritage is revealed. Devilyn is the only Fae who is both of the Light and of the Dark, and struggles to maintain that precarious balance to avoid succumbing to the power of the Dark within him. He is the only one who can save Caroline from those who would destroy her and destroy all hope for unity among the Fae. He promises Caroline that he will protect her at all costs, even when it means protecting her from himself. Told from the alternating perspectives of Caroline and Devilyn, Fae draws on mysteries, myths and legends to create a world, and a romance, dangerously poised between Light and Dark. Praise for the Fae trilogy "A phenomenal series."—Margaret Stohl, #1 New York Times bestselling coauthor of *Jo & Laurie* "Lovers you must buy a copy!"—Nicky Whelan, actress, *Hall Pass*, *Franklin & Bash* "Since the Twilight series recently came to an end, the search for the next hit teen novel is on. Fortunately, with C.J. Abedi's first book in the Fae series, there may be no need to look any further."—Firsttoknow.com
