is helping restore prisoners' sense of humanity while holding them accountable for their actions. Toews, with years of experience in prison work, shows how these practices can change prison culture and society. Written for an incarcerated audience, and for all those who work with people in prison, this book also clearly outlines the experiences and needs of this under-represented part of our society. A title in The Little Books of Justice and Peacebuilding Series.

This book views peacemaking as a broad, encompassing process that is expressed in many different shapes and forms. It blends ancient-wisdom traditions, peacemaking criminology, and restorative justice principles as a way of intervening with offenders in both institutional and community-based settings. Philosophical and spiritual contexts for peacemaking are presented that form a foundation for understanding the potential for peacemaking in criminological thought, the criminal justice system, and society in general.

Drawing on work from inside some of America's largest and toughest prisons, this book documents an alternative model of "restorative corrections" utilizing the lived experience of successful inmates, fast disrupting traditional models of correctional programming. While research documents a strong desire among those serving time in prison to redeem themselves, inmates often confront a profound lack of opportunity for achieving redemption. In a system that has become obsessively and dysfunctionally punitive, often fewer than 10% of prisoners receive any programming. Incarcerated citizens emerge from prisons in the United States to reoffend at profoundly high rates, with the majority of released prisoners ending up back in prison within five years. In this book, the authors describe a transformative agenda for incentivizing and rewarding good behavior inside prisons, rapidly proving to be a disruptive alternative to mainstream corrections and offering hope for a positive future. authors' expertise on the impact of faith-based programs on recidivism reduction and prisoner reentry allows them to delve into the principles behind inmate-led religious services and other prosocial programs—to show how those incarcerated may come to consider their existence as meaningful despite their criminal past and current incarceration. Religious practice is shown to facilitate the kind of transformational "identity work" that leads to desistance that involves a change in worldview and self-concept, and which may lead a prisoner to see and interpret reality in a fundamentally different way. With participation in religion protected by the U.S. Constitution, these model programs are helping prison administrators weather financial challenges while also helping make prisons less punitive, more transparent, and emotionally restorative. This book is essential reading for scholars of corrections, offender reentry, community corrections, and religion and crime, as well as professionals and volunteers involved in correctional counseling and prison ministry.

The school-to-prison pipeline is often the path for marginalized students, particularly black males, who are three times as likely to be suspended as White students. This volume provides an ethnographic portrait of how educators can implement restorative justice to build positive school cultures and address disciplinary problems in a more corrective and less punitive manner. Looking at the school-to-prison pipeline in a historical context, it analyzes current issues facing schools and communities and ways that restorative justice can improve behavior and academic achievement. By practicing a critical restorative justice, educators can reduce the domino effect between suspension and incarceration and foster a more inclusive school climate.

Americans are frustrated with prisons. They recognize the need for these institutions, but at the same time, they worry about whether the money used to build and maintain them is well spent. Older prisons are dirty, disgusting, and dangerous, but even newer facilities come up lacking in terms of offering inmates opportunities to take responsibility for their crimes, support their loved ones, further their education, learn job skills, and develop positive relationships in healthy, safe, respectful communities. This book provides insight into the philosophy of restorative justice, which aims to develop ways we can manage our prisons differently to achieve more positive outcomes. Using the case study of an honor dorm in a maximum security prison, the book posits that most of the inmates never learned the basic tools for living life productively and responsibly. They never thought much about their victims or how their actions affected others. They never learned how to get along with others, pick up after themselves, or how to be of service to their fellow man. Swanson uses the writings and reflections of inmates participating in a restorative justice program to demonstrate the challenges and transformative possibilities of this alternative approach to rehabilitation.

This is a practical handbook, written by professionals ... [with] a wonderfully reflective Foreword by Erwin James, a lifer, that will capture the imagination .... There are wonderful insights in this book as we would expect from two professionals who have devoted so much of their lives to work in our prisons. The small gestures of human feeling that pass between officers and inmates; the detailed case studies of violence; the experience of Belgian prisons; the damaging side effects of imprisonment and most impressively the list of prisons that have moved towards the restorative model. But it is the authors' unerring grasp of current police, prison and government cultures and their confidence that these can be moved gently towards restorative justice, that makes this book so significant for prison reform': John Myhill JP, extracts from a review in The Magistrate, January 2007.

"Profoundly necessary." -Michelle Alexander, New York Times columnist and author of The New Jim Crow In the eloquent tradition of Bryan Stevenson's Just Mercy, an award-winning leader in the movement to end mass incarceration takes on the vexing problem of violent crime Although over half the people incarcerated in America today have committed violent offenses, the focus of reformers has been almost entirely on nonviolent and drug offenses. Danielle Sered's brilliant and groundbreaking Until We Reckon steers directly and unapologetically into the question of violence, offering approaches that will help end mass incarceration and increase safety. Widely recognized as one of the leading proponents of a restorative approach to violent crime, Sered asks us to reconsider the purposes of incarceration and argues persuasively that the needs of survivors of violent crime are better met by asking people who commit violence to accept responsibility for their actions and make amends in ways that are meaningful to those they have hurt - none of which happens in the context of a criminal trial or a prison sentence. Sered launched and directs Common Justice, one of the few organizations offering alternatives to

incarceration for people who commit serious violent crime and which has produced immensely promising results. Critically, Sered argues that the reckoning owed is not only on the part of those who have committed violence, but also by our nation's overreliance on incarceration to produce safety—at great cost to communities, survivors, racial equity, and the very fabric of our democracy.

In this crucial study, named one of the Washington Post's Notable Nonfiction Books of 2016 and now in paperback, Baz Dreisinger goes behind bars in nine countries to investigate the current conditions in prisons worldwide. Beginning in Africa and ending in Europe, Incarceration Nations is a first-person odyssey through the prison systems of the world. Professor, journalist, and founder of the Prison-to-College-Pipeline program, Dreisinger looks into the human stories of incarcerated men and women and those who imprison them, creating a jarring, poignant view of a world to which most are denied.

America keeps expanding its prisons - despite the lack of any credible evidence to show that this punitive view of justice provides safer communities and reduces crime. But how is this justice system serving us? This book is an introduction to the concept and practice of restorative justice, by Jennifer Furio, who captured America's heart with her letter exchanges with murderers.
