~~The United States is one of history's great Christian nations, but our unique history, success, and global impact have seduced us into believing we are something more--God's New Israel, the new order of the ages, the last best hope of mankind, a redeemer nation. Using the subtle categories that arise from biblical narrative, Between Babel and Beast analyzes how the heresy of Americanism inspired America's rise to hegemony while blinding American Christians to our failures and abuses of power. The book demonstrates that the church best serves the genuine good of the United States by training witnesses--martyr-citizens of God's Abrahamic empire.~~

~~This textbook provides a comprehensive introduction to the concepts and idea of multisensor data fusion. It is an extensively revised second edition of the author's successful book: "Multi-Sensor Data Fusion: An Introduction" which was originally published by Springer-Verlag in 2007. The main changes in the new book are: New Material: Apart from one new chapter there are approximately 30 new sections, 50 new examples and 100 new references. At the same time, material which is out-of-date has been eliminated and the remaining text has been rewritten for added clarity. Altogether, the new book is nearly 70 pages longer than the original book. Matlab code: Where appropriate we have given details of Matlab code which may be downloaded from the worldwide web. In a few places, where such code is not readily available, we have included Matlab code in the body of the text. Layout. The layout and typography has been revised. Examples and Matlab code now appear on a gray background for easy identification and advandc material is marked with an asterisk. The book is intended to be self-contained. No previous knowledge of multi-sensor data fusion is assumed, although some familiarity with the basic tools of linear algebra, calculus and simple probability is recommended. Although conceptually simple, the study of mult-sensor data fusion presents challenges that are unique within the education of the electrical engineer or computer scientist. To become competent in the field the student must become familiar with tools taken from a wide range of diverse subjects including: neural networks, signal processing, statistical estimation, tracking algorithms, computer vision and control theory. All too often, the student views multi-sensor data fusion as a miscellaneous assortment of different processes which bear no relationship to each other. In contrast, in this book the processes are unified by using a common statistical framework. As a consequence, the underlying pattern of relationships that exists between the different methodologies is made evident. The book is illustrated with many real-life examples taken from a diverse range of applications and contains an extensive list of modern references.~~

~~All Hamlet Kennedy wants is to be a normal eighth grader. But with parents like hers - Shakespearean scholars who actually dress in Elizabethan regalia . . . in public! - it's not that easy. As if they weren't strange enough, her genius seven-year-old sister will be attending her middle school, and is named the new math tutor. Then, when the Shakespeare Project is announced, Hamlet reveals herself to be an amazing actress. Even though she wants to be average, Hamlet can no longer hide from the fact that she- like her family - is anything but ordinary.~~

~~Alibis of Empire presents a novel account of the origins, substance, and afterlife of late imperial ideology. Karuna Mantena challenges the idea that Victorian empire was primarily legitimated by liberal notions of progress and civilization. In fact, as the British Empire gained its farthest reach, its ideology was being dramatically transformed by a self-conscious rejection of the liberal model. The collapse of liberal imperialism enabled a new culturalism that stressed the dangers and difficulties of trying to "civilize" native peoples. And, hand in hand with this shift in thinking was a shift in practice toward models of indirect rule. As Mantena shows, the work of Victorian legal scholar Henry Maine was at the center of these momentous changes. Alibis of Empire examines how Maine's sociotheoretic model of "traditional" society laid the groundwork for the culturalist logic of late empire. In charting the movement from liberal idealism, through culturalist explanation, to retroactive alibi within nineteenth-century British imperial ideology, Alibis of Empire unearths a striking and pervasive dynamic of modern empire.~~

~~"Koja can pack a lot Dickensian humor into a sentence."--The Plain Dealer Under the Poppy is a brothel owned by Decca and Rupert. Decca is in love with Rupert but he in turn is in love with her brother, Istvan. When Istvan comes back to town, louche puppet troupe in tow, the lines of their age-old desires intersect against a backdrop of approaching war. Hearts are broken when old betrayals and new alliances--not just their own--take shape, as the townsmen seek refuge from the onslaught of history by watching the girls of the Poppy cavort onstage with Istvan's naughty puppets. When the war gets too close, Istvan and Rupert abandon the Poppy and find a place in high society where they try to avoid becoming more than puppets themselves in the hands of those they have helped before and who now want to use them again. From its explosive beginning to the final climax, Under the Poppy is a vivid, sexy, behind-the-scenes historical novel as delicious and intoxicating as the best guilty pleasure.~~
