This book provides finance professionals, Treasurers, and CFOs with a roadmap for making their SAP processes compliant with SOX requirements. Combining comprehensive coverage of the major applications (Electronic Banking, Positive Pay, Cash & Liquidity Management, In-House Cash) with discussion of relevant control structures, processes, and compliance matrices for each, this book lends guidance to those tasked with integrating SOX compliance into established or proposed SAP implementations. The authors focus first on processes (e.g., intercompany processing), then expand to specific applications (e.g., In-House Cash), followed by a summary of the associated controls (e.g., domestic vs. foreign processing). Functional-level finance professionals involved in the daily management of a Treasury implementation, particularly, will find many proven processes with which to build or enhance effective compliance strategies.

SAP Treasury and Risk Management (TRM) is a powerful business tool. It integrates seamlessly with the SAP General Ledger, handles many different calculation methods, and supports the SAP Electronic Bank Statement. On the debt side of the business it creates your service schedules, provides a tool for managing your entire portfolio, and facilitates the management of serial, term, capital appreciation and many other bond flavors. Issuing bonds is the focus of this book. From it, you will learn how to represent your organization's issues, handle the load of legacy data, and configure the system.

SAP Treasury and Risk Management (TRM) is a powerful business tool. It integrates seamlessly with the SAP General Ledger, handles many different calculation methods, and supports the SAP Electronic Bank Statement.
