Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

This classic by the distinguished Harvard entomologist tells how life on earth evolved and became diverse, and

now, how diversity and life are endangered by us, truly. While Wilson contributed a great deal to environmental ethics by calling for the preservation of whole ecosystems rather than individual species, his environmentalism appears too anthropocentric: "We should judge every scrap of biodiversity as

means to humanity."

And: "Signals abound
that the loss of life's
diversity endangers not
just the body but the
spirit." This reprint of
the 1992 Belknap Press
