To acquire content knowledge through reading, students must understand the complex components and diverse purposes of informational texts, as emphasized in the Common Core State Standards (CCSS). This practical book illuminates the ways in which a text's purpose, structure, details, connective language, and construction of themes combine to create meaning. Classroom-tested instructional recommendations and "kid-friendly" explanations guide teachers in helping students to identify and understand the role of these elements in different types of informational texts. Numerous student work samples, excerpts from exemplary books and articles, and a Study Guide with discussion questions and activities for professional learning add to the book's utility. ÿ

The last thing Natalia Kristoff expected was that her friend's wild dream to find her a fake husband for a Green Card would have any sort of success. Yet here she is, sitting in a private booth, listening to the sexiest man she's ever seen lay out the details of just what he needs from her. IN return, he's going to sign the papers that stand between her and her dream job. She can't believe what she's hearing. Stand at his side, pretend she's madly in love with him, all to satisfy some crazy family tradition? That's a deal she can live with. Kirell Ursa has a problem. A big one. His bear shifter family is in shambles, struck from within by traitors. With no one in charge of security, the head of his House has nominated him for the job. The only problem? Tradition dictates that anyone in power must have a mate. If he's going to pull off this scheme, he must find a mate in the next 72hrs. Someone. Anyone. All they have to do is pretend to love him for a few days. Things get off to a rocky start between the two when their first date is interrupted by Kirell's enemies. As he slowly exposes Natalia to the truth, she's forced to come to grips with the existence of another world, one she never thought existed. Shifters of all sorts collide as Kirell's enemies work to expose his fraud, but the harder they try, the more Natalia finds she wants to be by his side. Can a relationship built on a handshake business agreement turn into something real, even in the face of a threat to Natalia's very life?

Renowned biblical sleuth and scholar Richard Elliot Friedman reveals the first work of prose literature in the world—a 3000-year-old epic hidden within the books of the Hebrew Bible. Written by a single, masterful author but obscured by ancient editors and lost for millennia, this brilliant epic of love, deception, war, and redemption is a compelling account of humankind's complex relationship with God. Friedman boldly restores this prose masterpiece—the very heart of the Bible—to the extraordinary form in which it was originally written.

Wind Energy Engineering: A Handbook for Onshore and Offshore Wind Turbines is the most advanced, up-to-date and research-focused text on all aspects of wind energy engineering. Wind energy is pivotal in global electricity generation and for achieving future essential energy demands and targets. In this fast moving field this must-have edition starts with an in-depth look at the present state of wind integration and distribution worldwide, and continues with a high-level assessment of the advances in turbine technology and how the investment, planning, and economic infrastructure can support those innovations. Each chapter includes a research overview with a detailed analysis and new case studies looking at how recent research developments can be applied. Written by some of the most forward-thinking professionals in the field and giving a complete examination of one of the most promising and efficient sources of renewable energy, this book is an invaluable reference into this cross-disciplinary field for engineers. Contains analysis of the latest high-level research and explores real world application potential in relation to the developments Uses system international (SI) units and imperial units

throughout to appeal to global engineers Offers new case studies from a world expert in the field Covers the latest research developments in this fast moving, vital subject

Please note this is a Short Discount publication. This in-depth market and technology report surveys the markets, applications and manufacturing processes for metal powders. Coverage is given to both ferrous and non-ferrous metal powders with the emphasis on the more commercially significant materials such as iron and steel, stainless and tool steels, copper and copper-base alloys, aluminium, tin and nickel. Current and future markets are reviewed from a global perspective: consumption figures are analyzed for the major economic zones: Northern America, Europe, Japan. The major factors likely to impact on future metal powder consumption are examined and forecasts are presented for the main categories to the end of the decade. The report is completed by a comprehensive global survey of the relevant activities of the major powder-producing companies and industry trade associations.

Features: 120 blank, lined, white pages Section for recording your Monday through Friday School activities, Notes, and To-Do List 6" x 9" dimensions. Perfect sized School Daily Planner for your desk, tote bag, backpack, or purse at school, home, and work For use as a school planner, timetable, logbook, or school log, to record your homework and notesd Perfectly suited for students in Elementary School, Middle School, and High School The perfect gift for kids and adults on any gift giving occasion

Management of Coking Coal Resources provides a one-stop reference that focuses on sustainable mining practices using a four-point approach that includes the economical, governmental, societal, and environmental aspects of coal exploration, coking coal mining, and steelmaking applications. This type of approach galvanizes the excavation, processing methods, and end uses of coal as an energy and steelmaking source, thus ensuring that the supply of coking coal meets the future demands of the rapidly expanding economies in India and other developing countries. The book provides information on the strategic planning and revitalization of India's Jharia coalfield, addressing actionable plans for methods of extraction, master plans for mine fires, subsidence management, land use planning, and sustainable mining. Users will find a multidisciplinary reference that presents the broad range of applications, techniques, and methodologies used in maintaining coking coal quality from exploration through extraction. Provides a one-stop reference that focuses on sustainable mining practices using a four-point approach Includes the economical, governmental, societal, and environmental aspects of coal exploration, coking coal mining, and steelmaking applications Presents information on the strategic planning and revitalization of India's Jharia coalfield Includes a broad range of the applications, techniques, and methodologies used in maintaining coking coal quality from exploration through extraction

Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.

Natural Gas: A Basic Handbook, Second Edition provides the reader with a quick and accessible introduction to a fuel source/industry that is transforming the energy sector. Written at an introductory level, but still appropriate for engineers and other technical readers, this book provides an overview of natural gas as a fuel source, including its origins, properties and composition. Discussions include the production of natural gas from traditional and unconventional sources, the downstream aspects of the natural gas industry. including processing, storage, and transportation, and environmental issues and emission controls strategies. This book presents an ideal resource on the topic for engineers new to natural gas, for advisors and consultants in the natural gas industry, and for technical readers interested in learning more about this clean burning fuel source and how it is shaping the energy industry. Updated to include newer sources like shale gas Includes new discussions on natural gas hydrates and flow

assurance Covers environmental issues Contain expanded coverage of liquefied natural gas (LNG)

This book contains the papers presented at the 7th International Conference on Compressors and their Systems at City University London in conjunction with the IMECHE. This conference is the ultimate global forum for reviewing the latest developments and novel approaches in compressor research. It features contributions from equipment manufacturers, suppliers, users and research organisations; these papers present developments in air, gas and refrigeration compressors; vacuum pumps; expanders; and related systems and components. Papers cover the design, development and operation of a wide range of compressors and expanders. Equipment manufacturers, suppliers, users and research organisations are all represented. Aspects covered include: present and future developments in scroll compressors; design and optimisation of screw compressors; latest thinking in oscillating and vane compressors; improving the function of valves; latest research in dynamic compressors; detailed analysis of reciprocating compressors; improved accuracy and usefulness of modelling techniques; developing better control of centrifugal compressors; and reducing unwanted noise and vibration. Presents all the papers of the International Conference on Compressors and their Systems 2011 Up to date papers on compressor technology improvements The latest prediction modelling techniques are presented
