The description of the violence are a bit more detailed than Warrior cats since the concept of death is strongly stressed in the book; strong hearts are mandatory, after all, but if the parents approve read Warriors, it should be all good! The story is pretty family friendly with just a bit of a dark tone, and is something I'm happy to show I've written in my local community.

While this is the same rating I gave the previous book, I do think this one is a significant improvement over Strong Hearts Are Mandatory: Heart of Glass. I found this story to be overall much more immersive and engaging. The writing style is more refined, and the editing and formatting were greatly improved upon as well.

All of the land’s residents are gifted with intelligence, and a few even with the forbidden practice of magic. Within the contents of Heart of Glass, we follow the perspective of the main hero, a little noble cat known as the Radio Star. Radio is chosen to collect the fragments of a crystal heart left by a mysterious spider monkey only known as the Jester. She is accompanied by two companions, Pictures and Video, joining her in finding the shards scattered across all of Central Media in their occupations of surveillance and courier work, respectively. The opportunity to find the fragments of this broken heart is Radio’s first chance to venture out into the world that she’s only ever been able to listen to from the safety of her windowsill, and she’s going to make every heartbeat count. She’s just left to hope that Video and Pictures feel this opportunity is as beneficial for them, as it is to her.

Thomas Cowan was a 20-year-old Duke grad—bright, skeptical, and already disillusioned with industrial capitalism—when he joined the Peace Corps in the mid-1970s for a two-year tour in Swaziland. There, he encountered the work of Rudolf Steiner and Weston A. Price—two men whose ideas would fascinate and challenge him for decades to come. Both drawn to the art of healing and repelled by the way medicine was—and continues to be—practiced in the United States, Cowan returned from Swaziland, went to medical school, and established a practice in New Hampshire and, later, San Francisco. For years, as he raised his three children, suffered the setback of divorce, and struggled with a heart conditiion, he remained intrigued by the work of Price and Steiner and, in particular, with Steiner’s provocative claim that the heart is not a pump. Determined to practice medicine in a way that promoted healing rather than compounded ailments, Cowan dedicated himself to understanding whether Steiner’s claim could possibly be true. And if Steiner was correct, what, then, is the heart? What is its true role in the human body? In this deeply personal, rigorous, and riveting account, Dr. Cowan offers up a daring claim: Not only was Steiner correct that the heart is not a pump, but our understanding of heart disease—with its origins in the blood vessels—is completely wrong. And this gross misunderstanding, with its attendant medications and risky surgeries, is the reason heart disease remains the most common cause of death worldwide. In Human Heart, Cosmic Heart, Dr. Thomas Cowan presents a new way of understanding the body’s most central organ. He offers a new look at what it means to be human and how we can best care for ourselves—and one another.

Understanding more of God’s character and how he loves us changed bestselling author Holley Gerth’s life in beautiful, powerful ways. She realized that she didn’t have to settle for "I’m fine" when there was someone whispering to her in every moment, "You’re mine." The hope, joy, peace, and purpose she longed for were already there, in the heart of God. Now in 52 devotional readings, Holley shares with women the answer to the restlessness they feel in their hearts that keeps them hurrying, striving, pushing. She shows them that "the God who scattered stars like diamonds across the velvet of the universe, the keeper of every sparrow, the maker of us all, is inviting us to draw closer to him. He is the place where our hearts can go on the hard days and the happy ones, in the highs and lows, when we are sad or frustrated or downright giddy. He is what we’ve been searching for all along."

Argues that because human beings are all connected to each other and the planet, the key to creating a better world is to understand that our personal choices contain transformational power.
