The year is 1900, and Western empires—both old and new—are locked in regional entanglements across the globe. The British are losing a bitter war against the Boers while the German kaiser is busy building a vast new navy. The United States is struggling to put down an insurgency in the South Pacific while the upstart imperialist Japan begins to make clear to neighboring Russia its territorial ambition. In China, a perennial pawn in the Great Game, a mysterious group of superstitious peasants is launching attacks on the Western powers they fear are corrupting their country. These ordinary Chinese—called Boxers by the West because of their martial arts showmanship—rise up, seemingly out of nowhere. Foreshadowing the insurgencies of the more recent past, they lack a centralized leadership and instead tap into latent nationalism and deep economic frustration to build their army. Their battle cry: "Support the Qing, exterminate the foreigners." Many scholars brush off the Boxers as an ill-conceived and easily defeated revolt, but the military historian David J. Silbey shows just how close they came to beating back the combined might of all the imperial powers. Drawing on the diaries and letters of allied soldiers and diplomats, Silbey paints a vivid portrait of the short-lived war. Even though their cause ended just as quickly as it began, the bravery and patriotism of the Boxers would inspire Chinese nationalists—including a young Mao Zedong—for decades to come.

In 1900 a violent rebellion swept northern China – the Boxer Rebellion. The Boxers were a secret society who sought to rid their country of the pernicious influence of the foreign powers who had gradually acquired a stranglehold on China. With the connivance of the Imperial Court they laid siege to the legation quarter of Peking. Trapped inside were an assortment of diplomats, civilians and a small number of troops. They were all Sir Claude Macdonald, the British Minister in Peking, had to defend against thousands of hostile Boxers and Imperial troops. It would now be a race against time. Could the rag-tag defenders hold out long enough for the gathering relief force to reach them? This book describes the desperate series of events as the multinational force rushed to their rescue.

This book tells the story of the Boxer Rebellion in China in 1900. The Boxers were a fanatical secret organization who were incited by anti-foreign elements in the Chinese Government to commit wide-scale deportations against foreign missionaries and their Chinese converts. The Boxers had the tacit support of the Dowager Empress Tzu Hsi who maintained all the while that they were beyond her control. The Boxer Rebellion came to a head with the 55-day siege of the Peking Legations and ended in total humiliation for the Chinese.

In the summer of 1900, bands of peasant youths from the villages of north China streamed into Beijing to besiege the foreign legations, attracting the attention of the entire world. Joseph Esherick reconstructs the early history of the Boxers, challenging the traditional view that they grew from earlier anti-dynastic sects, and stressing instead the impact of social ecology and popular culture.

In the year 1900, an unprecedented co-operation occurred between the eight major military powers of the world. For more than a year military and naval personnel from Austria-Hungary, France, Germany, Great Britain, Italy, Japan, Russia and the United States fought together against a common enemy. That enemy was a society whose goal was the extermination of all 'foreign devils' in China – the I Ho Ch'uan, or Righteous Harmonious Fists, better known to the West as the Boxers. This engaging account, packed with original photographs and full colour artwork, tells the story of this unique occurrence in military history.

Portrays the dramatic human experience of the Boxer Rebellion from both a Western and Chinese perspective, drawing on diaries, memoirs, and letters of those who lived through this pivotal time in the history of China.

Part Two explores the thought, feelings, and behavior of the direct participants in the Boxer experience, individuals who, without a preconceived idea of the entire event, understood what was happening to them in a manner fundamentally different from historians.
