From Karl Iagnemma, recipient of the Paris Review Plimpton Prize, comes a fierce and gorgeous story of an estranged father and son's unlikely journey through the wilderness of nineteenth-century America. The year is 1844. Sixteen-year-old runaway Elisha Stone is in Detroit, a hardscrabble frontier town on the edge of the civilized world. A canny survivor with the instincts of a born naturalist, Elisha signs on to an expedition into Michigan's vast, uncharted Upper Peninsula. The party is led by two charismatic adventurers: Silas Brush, a ruthless land-grabbing ex-soldier, and George Tiffin, a quixotic professor desperate to discover proof of

his unorthodox theories about the origins of man. On the eve of the expedition's departure, Elisha pens a heartfelt letter to his mother in Newell, Massachusetts. But it is Elisha's estranged father, the Reverend William Edward Stone, who opens the envelope. Grief-stricken by the recent death of his wife—a death Elisha could not have known about—Reverend Stone is jolted into action: he must find his son. What follows is a powerful narrative about the complex love between fathers and sons and an evocative portrait of an era of faith, wonder, and violence. While Elisha's journey draws him deeper into uncharted territory, Reverend Stone must navigate through a country in turmoil as he moves toward an inevitable reunion with a son who has become a stranger. A first novel of uncommon wisdom, *The Expeditions* is the confirmation of an extraordinary talent.

The Expeditions is one of the oldest biographies of the Prophet Muhammad to survive into the modern era. Its primary author, Ma'mar ibn Rashid (714-770 AD/96-153 AH), was a prominent scholar from Basra in southern Iraq who was revered for his learning in prophetic traditions, Islamic law, and the interpretation of the Qur'an. This fascinating foundational seminal work contains stories handed down by Ma'mar to his most prominent pupil, 'Abd al-Razzaq of Sanaa, relating Muhammad's early life and prophetic career as well as the adventures and tribulations of his earliest followers during their conquest of the Near East. Edited from a sole surviving manuscript, the Arabic text offers numerous improved readings over those of previous editions, including detailed notes on the text's transmission and variants as found in later works. new translation, which renders the original into readable, modern English for the first time, is accompanied by numerous annotations elucidating the cultural, religious and historical contexts of the events and individuals described within its pages. The Expeditions represents an important testimony to the earliest Muslims' memory of the lives of Muhammad and his companions, and is an indispensable text for gaining insight into the historical biography of both the Prophet and the rise of the Islamic empire.

challenge—vicious wolves, sub-zero temperatures, and months of total darkness—as they set about exploring one of the most remote, unrelenting environments on the planet. In May 1882, they broke the 300-year-old record, and returned to camp to eagerly await the resupply ship scheduled to return at the end of the year. Only nothing came. 250 miles south, a wall of ice prevented any rescue from reaching them. Provisions thinned and a second winter descended. Back home, Greely's wife worked tirelessly against government resistance to rally a rescue mission. Months passed, and Greely made a drastic choice: he and his men loaded the remaining provisions and tools onto their five small boats, and pushed off into the treacherous waters. After just two weeks, dangerous floes surrounded them. Now new dangers awaited: insanity, threats of mutiny, and cannibalism. As food dwindled and the men weakened,
