The Garden of Rama is the third installment of a four part series. It's better than the second book, but nowhere near as good as the first. On the positive side: - It accurately portrays humans as the dysfunctional assholes they are.

~~The Garden of Rama (Rama, #3) by Arthur C. Clarke~~

'Rendezvous with Rama' is among my favourite books. I love the 'hard' sci-fi, the slow, deliberate pacing, the unresolved mystery, and the utter indifference of the alien mini-world to human presence; Garden of Rama could scarcely be any more different. I grew to hate most of the main characters in this book, they were so two-dimensional.

Returned to the Earth of 2037 by the mysterious and powerful Firstborn, Bisesa Dutt is haunted by memories of her five years spent on the strange alternate Earth called Mir, a jigsaw-puzzle world made up of lands and people cut out of different eras of Earth’s history. Why did the Firstborn create Mir? Why was Bisesa taken there and then brought back just a day after her disappearance? Bisesa’s questions are answered when scientists discover an unnatural anomaly in the sun’s core—evidence of alien intervention more than two thousand years ago. Now plans set in motion by inscrutable observers light-years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation. As the apocalypse looms, religious and political differences on Earth threaten to undermine every countereffort. And all the while, the Firstborn are watching. . . . Praise for Sunstorm

Hunter Blake, an inexperienced young colonist living in an off-world settlement in the twenty-fifth century, is kidnapped by "space pirates" and must decide whether his captors are ruthless bandits or freedom fighters. Reprint.

The technologically groundbreaking novel of space exploration from the only science fiction author nominated for a Nobel Peace Prize. Roy Malcolm has always been fascinated by space travel. And when he wins a voyage to the Inner Space Station as a game show prize, he’s sure it’s the trip of a lifetime. Before long, Roy is taken in by the young crew—and shares their adventures and lives. One of Arthur C. Clarke’s earliest novels, *Islands in the Sky* is particularly noteworthy for its description of geostationary communications satellites. While this technology was nonexistent during the writing of this book, it later became commonplace—and Clarke is credited with the first practical descriptions of

such technology. This book is compelling not just as a fictional tale, but as an example of the prescient power of Clarke's vision. "[Clarke is] one of the truly prophetic figures of the space age."
