The Making Of The British Landscape by Nicholas Crane ...

THE MAKING OF THE BRITISH LANDSCAPE: From Ice Age to the Present by Nicholas Crane. The European climatic spasm of 9,700BC saw the end of the ice age, the Cotswold glaciers retreating, Doggerland warming and hominids walking into our waking land along the Thames.

THE MAKING OF THE BRITISH LANDSCAPE: From Ice Age to the ...

'The Making Of The British Army' starts (obviously) with Cromwell's New Model army and progresses through history as a series of episodes towards the present day. There are a few battles presented in more detail, but as I've already said, it's mainly a socio-political book and an explanation of the origins of the quality of the British soldier.

The story of The Making of India begins in the seventeenth century, when a small seafaring island, one tenth the size of the Indian subcontinent, despatched sailing ships over 11,000 miles on a five-month trading journey in search of new opportunities. In the end they helped build a new nation. The sheer audacity and scale of such an endeavour, the courage and enterprise, have no parallel in ...

In *The Making of Modern Britain*, Andrew Marr paints a fascinating portrait of life in Britain during the first half of the twentieth century as the country recovered from the grand wreckage of the British Empire. Between the death of Queen Victoria and the end of the Second World War, the nation was shaken by war and peace. The two wars were the worst we had ever known and the episodes of peace among the most turbulent and surprising. As the political forum moved from Edwardian smoking rooms to an increasingly democratic Westminster, the people of Britain experimented with extreme ideas as they struggled to answer the question 'How should we live?' Socialism? Fascism? Feminism? Meanwhile, fads such as eugenics, vegetarianism and nudism were gripping the nation, while the popularity of the music hall soared. It was also a time that witnessed the birth of the media as we know it today and the beginnings of the welfare state. Beyond trenches, flappers and Spitfires, this is a story of strange cults and economic madness, of revolutionaries and heroic inventors, sexual experiments and raucous stage heroines. From organic food to drugs, nightclubs and celebrities to package holidays, crooked bankers to sleazy politicians, the echoes of today's Britain ring from almost every page.

The second edition of Steven Ellis's formidable work represents not only a survey, but also a critique of traditional perspectives on the making of modern Ireland. It explores Ireland both as a frontier society divided between English and Gaelic worlds, and also as a problem of government within the wider Tudor state. This edition includes two major new chapters: the first extending the coverage back a generation, to assess the impact on English Ireland of the crisis of lordship that accompanied the Lancastrian collapse in France and England; and the second greatly extending the material on the Gaelic response to Tudor expansion.

Nicholas Crane's new book brilliantly describes the evolution of Britain's countryside and cities. It is part journey, part history, and it concludes with awkward questions about the future of Britain's landscapes. Nick Crane's story begins with the melting tongues of glaciers and the emergence of a gigantic game-park tentatively being explored by a vanguard of Mesolithic adventurers who have taken the long, northward hike across the land bridge from the continent. The Iron Age develops into a pre-Roman 'Golden Era' and Crane looks at what the Romans did (and didn't) contribute to the British landscape. Major landscape 'events' (Black Death, enclosures, urbanisation, recreation, etc.) are fully described and explored, and he weaves in the role played by geology in shaping our cities, industry and recreation, the effect of climate (and the Gulf Stream), and of global economics (the Lancashire valleys were formed by overseas markets). The co-presenter of BBC's *COAST* also covers the extraordinary benefits bestowed by a 6,000-mile coastline. The 12,000-year story of the British landscape culminates in the twenty-first century, which is set to be one of the most extreme centuries of change since the Ice Age.

Edgehill, 1642: Surveying the disastrous scene in the aftermath of the first battle of the English Civil War, Oliver Cromwell realizes that war can no longer be made in the old, feudal way: there has to be system and discipline, and therefore - eventually - a standing professional army. From the 'New Model Army' of Cromwell's distant vision, former soldier Allan Mallinson shows us the people and events that have shaped the army we know today. How Marlborough's momentous victory at Blenheim is linked to Wellington's at Waterloo; how the desperate fight at Rorke's Drift in 1879 underpinned the heroism of the airborne forces at Arnhem in 1944; and why Montgomery's momentous victory at El Alamein mattered long after the Second World War was over. From the Army's origins at the battle of Edgehill to our current conflict in Afghanistan, this is history at its most relevant - and most dramatic.

Chronicles the history of India under British rule, from the eighteenth century to 1947, while exploring the various factors involved that led to the movement for

India's independence and the struggles that followed to attain it. 15,000 first printing.

Men and the Making of Modern British Feminism calls fresh attention to the forgotten but foundational contributions of men to the creation of modern British feminism. Focusing on the revolutionary 1790s, the book introduces several dozen male reformers who insisted that women's emancipation would be key to the establishment of a truly just and rational society. These men proposed educational reforms, assisted women writers into print, and used their training in religion, medicine, history, and the law to challenge common assumptions about women's legal and political entitlements. This book uses men's engagement with women's rights as a platform to reconsider understandings of gender in eighteenth-century Britain, the meaning and legacy of feminism, and feminism's relationship more generally to traditions of radical reform and enlightenment.

This volume reassesses the role of Indians in the politics and economics of early colonialism.

A compelling look at the origins of British socialism The Making of British Socialism provides a new interpretation of the emergence of British socialism in the late nineteenth century, demonstrating that it was not a working-class movement demanding state action, but a creative campaign of political hope promoting social justice, personal transformation, and radical democracy. Mark Bevir shows that British socialists responded to the dilemmas of economics and faith against a background of diverse traditions, melding new economic theories opposed to capitalism with new theologies which argued that people were bound in divine fellowship. Bevir utilizes an impressive range of sources to illuminate a number of historical questions: Why did the British Marxists follow a Tory aristocrat who dressed in a frock coat and top hat? Did the Fabians develop a new economic theory? What was the role of Christian theology and idealist philosophy in shaping socialist ideas? He explores debates about capitalism, revolution, the simple life, sexual relations, and utopian communities. He gives detailed accounts of the Marxists, Fabians, and ethical socialists, including famous authors such as William Morris and George Bernard Shaw. And he locates these socialists among a wide cast of colorful characters, including Karl Marx, Henry Thoreau, Leo Tolstoy, and Oscar Wilde. By showing how socialism combined established traditions and new ideas in order to respond to the changing world of the late nineteenth century, The Making of British Socialism turns aside long-held assumptions about the origins of a major movement.

This is the changing story of Britain as it has been preserved in our fields, roads, buildings, towns and villages, mountains, forests and islands. From our suburban streets that still trace out the boundaries of long vanished farms to the Norfolk Broads, formed when medieval peat pits flooded, from the ceremonial landscapes of Stonehenge to the spread of the railways - evidence of how man's effect on Britain is everywhere. In The Making of the British Landscape, eminent historian, archaeologist and farmer, Francis Pryor explains how to read these clues to understand the fascinating history of our land and of how people have lived on it throughout time. Covering both the urban and rural and packed with pictures, maps and drawings showing everything from how we can still pick out Bronze Age fields on Bodmin Moor to how the Industrial Revolution really changed our landscape, this book makes us look afresh at our surroundings and really see them for the first time.

‘ At the centre of the world-economy, one always finds an exceptional state, strong, aggressive and privileged, dynamic, simultaneously feared and admired. ’ - Fernand Braudel, Civilization and Capitalism, 15th – 18th Centuries This, surely, is an apt description of the British Empire at its zenith. Of Planting and Planning explores how Britain used the formation of towns and cities as an instrument of colonial expansion and control throughout the Empire. Beginning with the

Read Free The Making Of The British Landscape From The Ice Age To The Present

seventeenth-century plantation of Ulster and ending with decolonization after the Second World War, Robert Home reveals how the British Empire gave rise to many of the biggest cities in the world and how colonial policy and planning had a profound impact on the form and functioning of those cities. This second edition retains the thematic, chronological and interdisciplinary approach of the first, each chapter identifying a key element of colonial town planning. New material and illustrations have been added, incorporating the author's further research since the first edition. Most importantly, *Of Planting and Planning* remains the only book to cover the whole sweep of British colonial urbanism.
