The first book of the triumphant and epic four-part conclusion to the Shannara series, from one of the all-time masters of fantasy. Across the Four Lands, peace has reigned for generations. But now, in the far north, an unknown enemy is massing. More troubling than the carnage is the strange and wondrous power wielded by the attackers—a breed of magic unfamiliar even to the Druid order. Fearing the worst, the High Druid dispatches a diplomatic party under the protection of the order 's sworn guardian, Dar Leah, to confront the mysterious, encroaching force and discover its purpose. But another crucial journey is being undertaken. Exiled onetime High Druid Drisker Arc has been living in quiet seclusion, far from the politics and power struggles of his former life, until two brutal attacks by would-be assassins force him to seek out an infamous murder-for-hire guild—and find the hidden enemy who has marked him for death. At his side is Tarsha Kaynin, a young woman gifted with the wishsong and eager to be schooled in its formidable power by a master. She, too, is pursuing a mission: to locate her wayward brother, whose own magic has driven him to deadly madness and kindled his rage for vengeance . . . against his sister. In their darkest

This collection of essays examines how the paratextual apparatus of medieval manuscripts both inscribes and expresses power relations between the producers and consumers of knowledge in this important period of intellectual history. It seeks to define which paratextual features – annotations, commentaries, corrections, glosses, images, prologues, rubrics, and titles – are common to manuscripts from different branches of medieval knowledge and how they function in any particular discipline. It reveals how these visual expressions of power that organize and compile thought on the written page are consciously applied, negotiated or resisted by authors, scribes, artists, patrons and readers. This collection, which brings together scholars from the history of the book, law, science, medicine, literature, art, philosophy and music, interrogates the role played by paratexts in establishing authority, constructing bodies of knowledge, promoting education, shaping reader response, and preserving or subverting tradition in medieval manuscript culture.

The continuing crisis in Syria has raised questions over the common perception of Middle Eastern affairs as an offshoot of global power politics. To Western intellectuals, foreign policy experts, and politicians, “ empire ” and “ imperialism ” are categories that apply exclusively to Europe and more recently to the United States of America. As they see it, Middle Eastern history is the product of its unhappy interaction with these powers. Forming the basis of President Obama's much ballyhooed “ new beginning between the United States and Muslims around the world, ” this outlook is continuing to shape crucial foreign policy among Western governments, but in these pages, Efraim Karsh propounds a radically different interpretation of Middle Eastern experience. He argues that the Western view of Muslims and Arabs as hapless victims is absurd. On the contrary, modern Middle Eastern history has been the culmination of long-existing indigenous trends. Great power influences, however potent, have played a secondary role constituting neither the primary force behind the region's political development nor the main cause of its notorious volatility. Karsh argues it is only when

Middle Eastern people disown their victimization mentality and take responsibility for their actions and their Western champions drop their condescending approach to Arabs and Muslims, that the region can at long last look forward to a real “ spring. ”
