Lewis D. Solomon's book *The Privatization of Space Exploration*, now available in a 2012 softcover printing, is an effort to survey the rapidly changing industry of private space flight and suggest ways to encourage it. It should be noted that the title is really a misnomer, as many of the functions handled by the private firms covered in this book are not exploration per se but rather involve satellite launch equipment and services.

In 1962, Congress passed its first law pushing back the prohibition on private involvement in space, the Communications Satellite Act of 1962. While largely focusing on the satellites of its namesake, this was described by both the law's opponents and advocates of private space, as the first step on the road to privatisation.
