To make a sky map, enter the latitude and longitude of your observing site in the boxes below (be sure to

Download File PDF The Sky Is Your Laboratory

check the correct “North/South” and “East/West” settings) and press the “Make Sky Map” button below the form. Your Sky will deliver a map showing the sky above the location you specified at the current time. On that reply page you can enter different dates and times, observing locations, display options, and orbital elements of asteroids and comets you wish to track.

In the annals of space travel, Skylab is often a footnote. America's first space station, Skylab and its crews contributed mightily to our understanding of how humans adapt to living in space. Though less well known today than programs like Mir and the International Space Station, Skylab represents an important milestone in the history of manned space exploration.
