The Sociology of Islam provides an accessible introduction to this emerging field of inquiry, teaching and debate. The study is located at the crucial intersection between a variety of disciplines in the social sciences and the humanities. It discusses the long-term dynamics of Islam as both a religion and as a social, political and cultural force. The volume focuses on ideas of knowledge, power and civility to provide students and readers with analytic and critical thinking frameworks for understanding the complex social facets of Islamic traditions and institutions. The study of the sociology of Islam improves the understanding of Islam as a diverse force that drives a variety of social and political arrangements. Delving into both conceptual questions and historical interpretations, The Sociology of Islam is a transdisciplinary, comparative resource for students, scholars, and policy makers seeking to understand Islam's complex changes throughout history and its impact on the modern world.

Taking a thematic approach, Bryan S. Turner draws together his writings which explore the relationship between Islam and the ideas of Western social thinkers. Turner engages with the broad categories of capitalism, orientalism, modernity, gender, and citizenship among others, as he examines how Muslims adapt to changing times and how Islam has come to be managed by those in power.

Sociology of Shi'ite Islam is a comprehensive study of the development of Shi'ism from its sectarian formation in the eighth century through its establishment as Iran's national religion in the sixteenth to the Islamic revolution Iran in the twentieth century.

The contributions of Islam to world civilization are undeniable. However, in the last 100 years, Muslims have been confronted with the effects and ramifications of modernity, caused by the emergence of global capitalism. What does modernity ultimately mean for Muslims? How will the historical precepts of Islam meet the changes in our globalized world? To date, most scholars on Islam have tried to understand Muslim societies from historical observation alone. This simplistic academic approach does not allow us to understand the entire transformation that has taken place in Muslim societies. Sociological scholarship, on the other hand, argues that it would be difficult to understand Islam without first understanding the theoretical and practical underpinnings of the social structure of Muslim societies, which are embedded in the relationship between religion, the economy, politics, and society. This book - now available in paperback - makes a connection between the economic system and its social and political consequences in Muslim societies. It examines the role of Islam within Muslim societies in the context of ongoing and increasingly powerful, neoliberal, economic processes in a globalized world, and the way in which Islam influences the West because of the interdependent relations brought about by the global economy. These interdependencies create social and political transformation on both sides.

Reflecting the very latest developments in the field, the New Companion provides a comprehensive introduction to the sociology of religion with a clear emphasis on comparative and historical approaches. Covers major debates in secularization theory, rational choice theory, feminism and the body Takes a multidisciplinary approach, covering history, sociology, anthropology, and religious studies International in its scope, covering American exceptionalism, Native American spirituality, and China, Europe, and Southeast Asia Offers discussions on the latest developments, including "megachurches", spirituality, post-secular society and globalization

Militant Islam provides a sociological framework for understanding the rise and character of recent Islamic militancy. It takes a systematic approach to the phenomenon and includes analysis of cases from around the world, comparisons with militancy in other religions, and their causes and consequences. The sociological concepts and theories examined in the book include those associated with social closure, social movements, nationalism, risk, fear and 'de-civilising'. These are applied within three main themes; characteristics of militant Islam, multi-layered causes and the consequences of militancy, in particular Western reactions within the 'war on terror'. Interrelationships between religious and secular behaviour, 'terrorism' and 'counter-terrorism', popular support and opposition are explored. Through the examination of examples from across Muslim societies and communities, the analysis challenges the popular tendency to concentrate upon 'al-Qa'ida' and the Middle East. This book will be of interest to students of Sociology, Political Science and International Relations, in particular those taking courses on Islam, religion, terrorism, political violence and related regional studies.

Translated by Ephraim Fischhoff With a new Foreword by Ann Swidler

The contributors to this book explore how 'bringing the social back into the sociology of religion' allows a better understanding of contemporary religious life. They do so by engaging with social theories and addressing issues of epistemology and scientific reflexivity.

With the Islamic awakening in the Middle East, the "Principles of Islamic Sociology" illustrates the nuts and bolts of Islamic society with a contemporay vision that is possible within the realm of Islamic law and thinking. According to Muslim scholars, the beauty of Islamic law is that it is not stagnant. The Qur'an applies to all ages and periods. Dr Younos successfully demonstrates not only the principles of Islamic sociology as an academic discipline, but also a new thinking and vision for a Muslim society in the contemporary world. This book answers a compelling question: In what way should Muslims decide on their social existence in the age of globalization? Reforms within Muslim soieties is a must. The only solution is reform their socio-political system by implementing Islamic vlaues based upon a new interpretation of Islam. "Principles of Islamic Sociology" has managed to achieve that goal.
