M takes the attack personally and sends James Bond to protect King's beautiful and fiery daughter Elektra in Turkey. The man responsible for the bombing is 'Renard', a terrorist who once attempted to kidnap Elektra King and hold her to ransom. With nuclear weapons expert Dr Christmas Jones at his side, Bond travels to the Caspian sea and Istanbul where a former enemy becomes a formidable ally before the final dramatic confrontation in a nuclear submarine.

"This fresh biography of Ian Fleming presents an illuminating portrayal of the iconic creator of James Bond. The New York Times—bestselling roadmap to resistance in the Trump era from the internationally acclaimed activist and author of On Fire and The Battle for Paradise. The election of Donald Trump is a dangerous escalation in a world of cascading crises. Trump’s vision—a radical deregulation of the US economy in the interest of corporations, an all-out war on “radical Islamic terrorism,” and a sweeping aside of climate science to unleash a domestic fossil fuel frenzy—will generate wave after wave of crises and shocks, to the economy, to national security, to the environment. In No Is Not Enough, Naomi Klein explains that Trump, extreme as he is, is not an aberration but a logical extension of the worst and most dangerous trends of the past half-century. In exposing the malignant forces behind Trump’s rise, she puts forward a bold vision for a mass movement to counter rising militarism, nationalism, and corporatism in the United States and around the world. Longlisted for the National Book Award “I hope that Klein’s book is read by more than just her (mostly) leftwing fan base. For whatever you think about her economic arguments, she makes a powerful and an important point: that you cannot understand Trump without looking at how he reflects bigger cultural and social dynamics. And what is perhaps refreshing about No Is Not Enough is that Klein tries to move beyond mere outrage and hand-wringing to offer a practical manifesto for opposition.” —Financial Times “Brimms with ideas rarely heard in the mainstream media. And her fiery, punchy writing style, which is occasionally laced with humor, makes it hard to put down.” —The Georgia Straight

The globalised world of the twenty-first century has many parallels with that of the period running up to the cataclysm of 1914, namely the world predicted by Karl Marx. Communications go that much faster, but this is a difference of degree, not type. People, messages, and ideas are flung around the globe. Money circulates in a never-ceasing torrent, poverty lives side by side with wealth, and capital exercises its impersonal power over each and every one of us. In this world, Karl Marx blunt and straightforward enough to inspire criticism of the latest exploits of capitalism, the failings of politics, and the genuflection of those in power before fetishes like The Market ' lives on. Despite nearly 200 years having passed since his birth, his burning condemnation of capitalism remains of immediate interest today. The texts he left behind gave rise to what would come to be called Marxism, but that was a term he rejected. His approach enormous amounts of reading and writing, integrating new discoveries from the various sciences into his analyses of society was a far cry from how his theories would come to be used in states where only one, party-approved interpretation was allowed. Now, more than ever before, these texts can be read for what they truly are. In addition to providing a living picture of Marx the man, his life, and his family and friends as well as his lifelong collaboration with Friedrich Engels Sweden 's leading intellectual historian Sven-Eric Liedman, in this major new biography, shows what Karl Marx the thinker and researcher really wrote, demonstrating that this giant of the nineteenth century can still exert a powerful attraction for the inhabitants of the twenty-first.

An apprentice writer has an entirely unexpected encounter with literary genius Jorge Luis Borges that will profoundly alter his life and work. A poignant and comic literary coming-of-age memoir. "This is a jewel of a book."  
--Ian McEwan  
In 1971 Jay Parini was an aspiring poet and graduate student of literature at University of St Andrews in Scotland; he was also in flight from being drafted into service in the Vietnam War. One day his friend and mentor, Alastair Reid, asked Jay if he could play host for a "visiting Latin American writer" while he attended to business in London. He agreed--and that "writer" turned out to be the blind and aged and eccentric master of literary compression and metaphysics, Jorge Luis Borges. About whom Jay Parini knew precisely nothing. What ensued was a seriocomic romp across the Scottish landscape that Borges insisted he must "see," all the while declaiming and reciting from the literary encyclopedia that was his head, and Jay Parini's eventual reckoning with his vocation and personal fate.
