THERAPEUTIC FOOTWEAR: A COMPREHENSIVE GUIDE gives authoritative and wide-ranging information to health professionals concerned with the prescribing and fitting of surgical and corrective footwear. Wendy Tyrrell and Gwenda Carter have combined their many years of teaching and clinical experience to produce a textbook that is accessible, clear and without doubt the most definitive account of the subject currently available. Broad in scope, the text ranges through patient assessment, suitability of styles, retail and bespoke footwear, orthoses, measuring and fitting, all from the relatively simple to the most complex of cases. There is no other available single resource that offers such complete support and guidance to practitioners who wish to prescribe, fit and assess the effectiveness of therapeutic footwear.

Providing authoritative information to health professionals concerned with the prescribing and fitting of surgical and corrective footwear, this text ranges through patient assessment, suitability of styles, and measuring and fitting, all from the relatively simple to the most complex of cases.

Human Body: A Wearable Product Designer's Guide, unlike other anatomy books, is divided into sections pertinent to wearable product designers. Two introductory chapters include many definitions, an introduction to anatomical terminology, and brief discussions of the body's systems, setting the stage for the remaining chapters. The book is extensively referenced and has a large glossary with both anatomical and design terms making it maximally useful for interdisciplinary collaborative work. The book includes 200 original illustrations and many product examples to demonstrate relationships between wearable product components and anatomy. Exercises introduce useful anatomical, physiological, and biomechanical concepts and include design challenges. Features Includes body

This new edition of the comprehensive and renowned textbook Principles and Practice of Geriatric Medicine offers a fully revised and updated review of geriatric medicine. It covers the full spectrum of the subject, features 41 new chapters, and provides up-to-date, evidence-based, and practical information about the varied medical problems of ageing citizens. The three editors, from UK, USA and France, have ensured that updated chapters provide a global perspective of geriatric medicine, as well as reflect the changes in treatment options and medical conditions which have emerged since publication of the 4th edition in 2006. The book includes expanded sections on acute stroke, dementia, cardiovascular disease, and respiratory diseases, and features a new section on end-of-life care. In the tradition of previous editions, this all-encompassing text continues to be a must-have text for all clinicians who deal with older people, particularly geriatric medical

The Foot Book is an all-inclusive resource for everyone suffering from foot and ankle disorders, as well as physicians and other medical personnel who care for them.

A Guide to Therapeutic Child Care provides an easy to read explanation of the secrets that lie behind good quality therapeutic child care. It describes relevant theories, the 'invisible' psychological challenges that children will often struggle with and how to develop a nurturing relationship and build trust. Combining advice with practical strategies, the book also provides specific guidance on how to create safe spaces (both physical and relational) and how to aid the development of key social or emotional skills for children which may be lacking as a result of early trauma. Written with input from foster carers, the book is an ideal guide for
