Incredibly comprehensive, this book is the ultimate reference source to every aspect of these machines, including 22 very detailed model profiles and delivery details of 113,000 individual machines to 153 countries, color schemes and much, much more. It contains full international history of the popular Triumph Tiger Cub & Triumph Terrier motorcycles, technical and design specifications of engine and transmission components, lubrication, fuel and electrical systems.

Inside this manual the reader will learn to do routine maintenance, tune-up procedures, engine repair, along with aspects of your car such as cooling and heating, air conditioning, fuel and exhaust, emissions control, ignition, brakes, suspension and steering, electrical systems, wiring diagrams.

1945 to 1955 (and later?) Models: An illustrated workshop manual covering Triumph twin-cylinder motorcycles from 1945 to 1955: This is a faithful reproduction of the Factory Workshop Manual No. 11, originally published in the US by Floyd Clymer. The major revision in the later pre-unit factory manuals was the addition of technical specifications for the T120 Bonneville (1959). Unfortunately, those revisions also included the deletion of repair data for rigid frame, sprung hub and 3T models. This makes the Factory Workshop Manual No. 11 the most comprehensive workshop manual available for pre-unit, twin-cylinder Triumph motorcycles up to and including 1962 models as it includes repair and maintenance data for the full line of rigid frame, sprung hub, swing-arm and 350cc models. Much more detailed than the owner's handbook, this manual provides the information necessary for the overhaul of engines, gear boxes, frames, swing-arm, forks, wheels, hubs, carburetors, electrics, etc., essential information for the enthusiast, owner or restorer of these classic motorcycles. Size: 5.5" x 8.5" with 224 pages and 84 illustrations, includes 8 pages of detailed technical specification charts and both an illustration index and a comprehensive index of contents. Applicable to the following models: 5T Speed Twin, T100 Tiger 100, TR5 Trophy, 6T Thunderbird, T110 Tiger 110 and 3T De-Luxe. Includes maintenance and repair data for the following engines: Twin Cylinder 350cc OHV, 500cc OHV and 650cc OHV.

The ultimate reference for Triumph lovers and fans of British motorcycles, The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today collects all of the motorcycles from this iconic brand in a single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!
