THE Queen has been urged not to reinstate Prince Harry and Meghan Markle's HRH titles following Megxit. The couple agreed to give up their royal titles after they made the decision to become ...

This report describes the ICETHK computer model that is used in conjunction with the HEC-2 backwater model to simulate equilibrium ice jam profiles. The ICETHK model fulfills an important need in studies that require the calculation of ice jam affected stage. This report presents the theory and limitations of ICETHK and serves as a user's manual, and concludes with a discussion of river ice modeling using ICETHK.

This book contains driver's manual for the State of New Hampshire

The Arizona Department of Transportation Motor Vehicle Division (ADOT MVD) is pleased to provide this guide to Arizona traffic laws and information for obtaining a driver license or identification card. This manual also provides essential safety information for both new and experienced Arizona drivers. ADOT MVD delivers services to millions of Arizona motorists each year. In line with the Division's vision of getting Arizona "out of the line and safely on the road" we are continuously improving processes to provide swift and efficient service. In addition to coming into an office, ADOT MVD offers alternative methods for Arizonans to access services. For example, through ServiceArizona.com, customers are able to complete more than 20 motor vehicle transactions, such as renewing your vehicle registration, requesting a replacement driver license, updating your address, and purchasing a

personalized or specialty license plate. We also encourage Arizona drivers to take advantage of the more than 160 privately operated Authorized Third Party locations to serve you across the state. Several of these locations offer both Title and Registration and driver license transactions!

An opinionated, illustrated guide for cocktail beginners, covering the basics of spirits plus making and drinking cocktails, written by celebrated craft cocktail bartender Jeffrey Morgenthaler. This easy-reading, colorful introduction for cocktail beginners, with approximately 100 succinct lessons on drinking culture, spirits, and cocktail making, is delivered in the pithy, wry style Morgenthaler is known for in his instructional videos and writing for beverage publications. Novices will learn how to order a drink, how to drink with the boss, how to drink at the airport, and more. Twelve perfect starter recipes—ranging from a Dry Gin Martini to a Batched Old-Fashioned (perfect for the flask)—plus thirty original illustrations round out this distillation for new enthusiasts.

The Hydrologic Engineering Center (HE) is developing next generation software for one-dimensional river hydraulics. The HEC-RAS River Analysis System is intended to be the successor to the current steady-flow HEC-2 Water Surface Profiles Program as well as provide unsteady flow, sediment transport, and hydraulic design capabilities in the future. A common data representation of a river network is used by all modeling methods, thus allowing the user to more easily migrate from steady-flow model with several significant advances over HEC-2. An overview of the Version 1 program package and some of the improved hydraulic features are presented.
