What is Equivalence Theory in Translation Studies? Jacobson, Nida, Paul, Anton Popovic A Virtual Presentation on A Methodology for Translation Vinay And Darbelnet And The Jean-Paul Vinay and Jean Darbelnet (1958/1995) identify two general translation strategies in their model; direct and oblique translation. They argue that translators in some cases may transpose the message of the ST element by element to the TT because of either a \u201cstructural parallelism\u201c or a \u201cmetalinguistic parallelism\u201c existing between the two languages.

Vinay and Darbelnet: Direct and Oblique translation - Free ...

Way back in the 1950s, two French scholars named Jean-Paul Vinay and Jean Darbelnet explored the linguistic aspects of translation. The field of Translation Studies didn't really exist at the time, so most of what Vinay and Darbelnet did was considered comparative literature. When looking at the work of Vinay and Darbelnet, the term contrastive linguistics seems much more appropriate, as what they did was look at the differences between two languages in order to inform their understanding of ...

Intro to Translation Studies: Vinay and Darbelnet's ...

Jean-Paul Vinay (18 July 1910 \u2013 10 April 1999) was a French-Canadian linguist. He is considered one of the pioneers in translation studies, along with Jean Darbelnet, with whom Vinay co-authored *Stylistique compar\u00e9e du fran\u00e7ais et de l'anglais* (1958), a seminal work in the field. Life and career

Jean-Paul Vinay - Wikipedia

One day in the mid 1950s, Jean-Paul Vinay and Jean Darbelnet were driving from New York to Montreal. Their account, in the introduction to their landmark *Stylistique compar\u00e9e du fran\u00e7ais et de l'anglais* of 1958, is one of the most entertaining passages in Translation Studies:

VINAY AND DARBELNET'S MODEL IN MEN IN THE SUN 3 *Men in the Sun* (2015), which was first published in 1963, is an Arabic novel written by a Palestinian author, Ghassan Kanafani and was translated into English by Hilary Kilpatrick in 1999.

An Application of Vinay and Darbelnet's Translation Model ...

This study, first of all, makes use of Vinay and Darbelnet's (1958) taxonomy of translation shifts. Moreover, Munday's (2008) concept of cohesion is used. This research study aimed to show what strategies the translators used in their translations of *Divorce Surah* of the Holy Quran.

[PDF] Study of Vinay and Darbelnet's Seven Translation ...

Vinay and Darbelnet (2008) believe a translator is justified to use modulation when a literal translation would end in an 'unsuitable, awkward and unidiomatic' translation in TL. Vinay and Darbelnet (2008) place much store by modulation as 'the touchstone of a good translator', whereas transposition 'simply shows a very good command of the target language' (as cited in Munday 2008, p. 57).

A Comparative Study of Modulation in English Translations ...

The classical taxonomy of translation procedures dates back to 1958 and is the work of J. P. Vinay and J. Darbelnet. It consists of seven categories: 1. Borrowing. Borrowing is a translation technique that involves using the same word or expression in original text in the target text.

The *Stylistique comparée du français et de l'anglais* has become a standard text in the French-speaking world for the study of comparative stylistics and the training of translators. This updated, first English edition makes Vinay & Darbelnet's classic methodology of translation available to a wider readership. The translation-oriented contrastive grammatical and stylistic analyses of the two languages are extensively exemplified by expressions, phrases and texts. Combining description with methodological guidelines for translation, this volume serves both as a course book and through its detailed index and glossary as a reference manual for specific translation problems.

Translation Studies and linguistics have been going through a love-hate relationship since the 1950s. This book assesses both sides of the relationship, tracing the very real contributions that linguists have made to translation studies and at the same time recognizing the limitations of many of their approaches. With good humour and evenhandedness, Fawcett describes detailed taxonomies of translation strategies and deals with traditional problems such as equivalence. Yet he also explains and assesses the more recent contributions of text linguistics, sociolinguistics, pragmatics and psycholinguistics. This work is exceptional in that it presents theories originally produced in Russian, German, French and Spanish as well as English. Its broad coverage and accessible treatment provide essential background reading for students of translation at all levels.

Many "translation solutions" (often called "procedures," "techniques," or "strategies") have been proposed over the past 50 years or so in French, Chinese, Russian, Ukrainian, English, Spanish, German, Japanese, Italian, Czech, and Slovak. This book analyzes, criticizes and compares them, proposing a new list of solutions that can be used in training translators to work between many languages. The book also traces out an entirely new history of contemporary translation studies, showing for example how the Russian tradition was adapted in China, how the impact of transformational linguistics was resisted, and how scholarship has developed an intercultural metalanguage over and above the concerns of specific national languages. The book reveals the intensely political nature of translation theory, even in its most apparently technical aspects. The lists were used to advance the agendas of not just linguistic nationalisms but also state regimes - this is a history in which Hitler, Stalin, and Mao all played roles, Communist propaganda and imperialist evangelism were both legitimized, Ukrainian advances in translation theory were forcefully silenced in the 1930s, the Cold War both stimulated the application of transformational grammar and blocked news of Russian translation theory, French translation theory was conscripted into the agenda of Japanese exceptionalism, and much else.

*Toward a Science of Translating*, first published in 1964, is still very much in demand today. Written by a linguist and anthropologist with forty years of experience in the field of language and religion, this work describes the major components of translating; setting the translating into the context of historical changes in principles and procedures over the last two centuries. With an emphasis on texts being understood within their cultural contexts, one of the reasons for its continuing relevance is the broad number of illustrative examples taken from field experience of translators in America, Africa, Europe and Asia.

This volume painstakingly formulates a composite model of translation procedures that covers both linguistic and cultural aspects inherent in translation. The model is based on an integration of three classic taxonomies of translation procedures proposed by influential translation scholars, namely Vinay and Darbelnet (1995), Newmark (1988), and Dickins, Herve and Higgins (2002/2016). The book combines these three taxonomies into an integrated model and extends it, effectively, to identify patterns of translation procedures and overall strategies in English-Kurdish translation of journalistic texts. The book is a breakthrough in the field of journalistic translation between the two languages. With a clear definition and exemplification of each translation procedure, the importance of the model is that it is replicable for future descriptive translation studies and can be carried out in other language pairs and on other genres. Moreover, the model is comprehensive in nature, and covers almost all translational changes and shifts that may occur in the translation process. Thus, this model of translation procedures transcends previous frameworks in such a way that prospective translation researchers will not need to go back to these older models of translation procedures.

Provides support for advanced study of translation. Examines the theory and practice of translation from many angles, drawing on a wide range of languages and exploring a variety of sources. Concludes with readings from key figures.

In this book, both beginning and experienced translators will find pragmatic techniques for dealing with problems of literary translation, whatever the original language. Certain challenges and certain themes recur in translation, whatever the language pair. This guide proposes to help the translator navigate through them. Written in a witty and easy to read style, the book's hands-on approach will make it accessible to translators of any background. A significant portion of this Practical Guide is devoted to the question of how to go about finding an outlet for one's translations.

This text guides the reader through the varying approaches to translation studies in the latter half of the 20th century. Chronologically ordered and divided into clear sections, it collects together key essays, articles and book extracts.
