Innovation and Technology - Strategies and Policies contains a selection of outstanding contributions by world experts on how a culture of innovation is able to produce a response to fast global changes affecting society. The book describes major evolutionary directions and foreseen trends in: environment versus industry; technology breakthroughs; energy planning; education and research; intangible investment requirements; new health technologies; and economics and management of innovative actions at strategic, organisational and technological levels. The actual percolation of the innovative process throughout the multiple facets of society is presented in relation to the main challenges facing us in the 21st Century. The book is addressed to all those concerned with innovation in dynamic terms as a creative response to the ongoing changes in society integrating sciences, technologies, humanities, life-long education and training, and other disciplines.

Over the past few years, search engine optimization has developed into something of a science as webmasters and business owners try to figure out how to trick the internet search engines into listing THEIR sites near the top of the search results list. A number of big, pricey books have been written on the subject. But it really is not that complicated! We've boiled it down to FIVE SIMPLE STEPS that just about anybody can follow. It's so simple that this book is fewer than 50 pages long! You won't get bogged down with boring, technical descriptions and geek-speak; this book is written in easy-to-read plain English, with plenty of examples and clear descriptions of technical terms where they are absolutely necessary. "But I'm not a web designer!" You don't need to be. You just need to be able to create simple web pages. "I don't have a budget for paid ads!" This book is not about paying for "sponsored links," adwords, or any other kind of paid advertising. The technique we describe will cost you nothing other than the price of this book and some of your time.
