Then join NG KiDS as we take a look at the different stages of the wonderful water cycle— Evaporation. Energy from the sun heats up the surface of the Earth, causing the temperature of the water in our rivers, lakes and oceans to rise. When this happens, some of the water "evaporates" into the air, turning into a gas called "vapour". Plants and trees also lose water to the atmosphere through their leaves.

The Water Cycle! | National Geographic Kids
The water cycle is the path that all water follows as it moves around Earth in different states. Liquid water is found in oceans, rivers, lakes—and even underground. Solid ice is found in glaciers, snow, and at the North and South Poles. Water vapor—a gas—is found in Earth's atmosphere.

After all, he and his dad make oodles of glue projects at home. One day during art class, Matty finds the fullest bottles of glue, and the fun begins. With a squeeze and a plop, Matty pours a lake of glue before belly-flopping right in the middle and finds himself stuck to the desk. When Matty's dad arrives at the school, instead of being mad, he celebrates his son's creativity and calls him a work of art. With vibrant language and artwork and a wild, silly plot, Too Much Glue is sure to appeal to all children who love to get messy.
